INDEPENDENT AUDITOR'S REPORT

To the Members of Apollo Green Energy Limited (formerly known as Apollo International Limited)

Report on the Audit of Consolidated Financial Statements

Opinion

We have audited the accompanying Consolidated Financial Statements of Apollo Green Energy Limited (formerly known as Apollo International Limited) ("the Holding Company or the Company") and its subsidiaries (Holding Company and its subsidiaries together referred to as "the Group"), which comprise the Consolidated Balance Sheet as at March 31, 2024, Consolidated Statement of Profit and Loss (including other comprehensive income), Consolidated Statement of Changes in Equity and Consolidated Statement of Cash Flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies and other explanatory information (the "consolidated financial statements").

In our opinion and to the best of our information and according to the explanations given to us, and based on consideration of reports of other auditors on separate financial statements and on the other financial information of subsidiaries which have not been audited by us, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with Companies (Indian Accounting Standards) Rules, 2015 as amended (the "Ind AS") and other accounting principles generally accepted in India, of the consolidated state of affairs of the Group, as at March 31, 2024, its consolidated comprehensive income (including other comprehensive income), consolidated changes in equity and its consolidated cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements" section of our report (Refer Annexure "A"). We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in India in terms of the Code of Ethics issued by the Institute of Chartered Accountant of India ("ICAI"), and the relevant provisions of the Act, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained, and the audit evidence obtained by the other auditors in terms of their reports referred to in "Other Matters" section below, is sufficient and appropriate to provide a basis for our opinion.

A. Emphasis of Matters

- We draw attention to the fact that audit of financial statements of Apollo International PTE Limited & Apollo TTG East Africa Limited for the year ended 31st March, 2024 could not be completed. The financial statements of above subsidiary have been consolidated with those of the company on unaudited basis.
- On 28th April 2024, A minor fire had occurred at company's factory situated at B 21, Sector 65, Noida, Uttar Pradesh. As per initial assessment, estimated loss of the Property, Plant & Equipment and Inventory is Rs. 7 crores. No provision is required being "Event occurring after the Balance Sheet date" as per IND AS-10. The company has lodged appropriate claims for such damage with the insurance company. (Refer Note No. 59(b))
- The company has received an advance of Rs. 9.81 Crores from Apollo Fashion International Limited against slump sale of its leather division on a total consideration of Rs. 95 Crores. The transfer of the business shall come into effect from 01-06-2024 [Refer Note no. 59(a) of the consolidated financial statement].
- The company has entered into Business Transfer Agreement with M/s Apollo Pro X Limited With effect from 01st April, 2024, the Trading Division shall be transferred to M/s Apollo Pro X Limited. [Refer Note no. 61 of the consolidated financial statement].
- Non- provision of outstanding against NTPC GE Power Services Limited, management considering high probability of recovery of entire outstanding. (Refer Note No. 60)
- Non- provision of outstanding against M/s Secretaria De Agriculture Y Ganaderia, management considering high probability of recovery of entire outstanding. (Refer Note No. 60).
- The outstanding receivable of Rs. 6.22 crores from M/s Supriya Pharmaceuticals Limited have been adjusted in the books of accounts as per the terms of judgement pronounced by NCLT vide IA (IBC) No. 644/JPR/2023 in CP No. (IB) - 74/9/JPR/2021 dt. 22/12/2023. (Refer note no. 8(v)).

Our opinion is not modified in respect of these matter.

Information Other than the Consolidated Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information obtained at the date of this auditor's report, but does not include the standalone financial statements, consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in terms of the requirements of the Act that give a true and fair view of the consolidated financial position, consolidated financial performance, consolidated changes in equity and consolidated cash flows of the Group in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under section 133 of the Act. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of such companies respectively and for preventing and detecting frauds and other irregularities; the selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the ability of company to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of such companies either intend to liquidate the company or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group responsible for overseeing the financial reporting process of each such company.

Auditor's Responsibilities for the Audit of Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standards of Auditing ("SAs") will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

We give in "Annexure A" a detailed description of Auditor's responsibilities for Audit of the Consolidated Financial Statements.

Other Matters

We did not audit the financial statements of seven subsidiaries, eight step down subsidiaries and one Associate entity. The financial statements of seven subsidiaries and eight step down subsidiaries reflect total assets of 44,433 Lacs as at 31st March, 2024, total revenues of Rs.9,368 Lacs and net cash flows amounting to Rs.414 Lacs for the year ended on that date, as considered in the consolidated financial statements. This financial statements have been audited by other auditors whose reports have been furnished to us by the Management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries, step down subsidiaries and our report in terms of sub-sections (3) and (11) of Section 143 of the Act, insofar as it relates to the aforesaid subsidiaries, step down subsidiaries is

based solely on the reports of the other auditors.

Report on Other Legal and Regulatory Requirements

- As required by the Companies (Auditor's Report) Order, 2020 ("CARO 2020"), issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Act, we give in the Annexure B, a statement on the matter specified in paragraph 3(xxi) of CARO 2020.
- As required by Section 143(3) of the Act, based on our audit and on the consideration of reports of the other auditors on separate financial statements of the subsidiary companies incorporated in India and referred to in the other matter section above and which have been audited by other auditors/ certified by the management, we report, to the extent applicable, that:
 - We have sought and, obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated financial statements.
- In our opinion, proper books of accounts as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books, and the reports of the other auditors.
- The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss, the Consolidated Statement of Changes in Equity and the Consolidated Statement of Cash Flow dealt with by this Report are in agreement with the relevant books of accounts maintained for the purpose of preparation of the consolidated financial statements.
- In our opinion, the aforesaid consolidated financial statements comply with the Indian Accounting Standards specified under Section 133 of the Act, read with Companies (Indian Accounting Standards) Rules, 2015.
- On the basis of the written representations received as on March 31, 2024 from the directors of the Holding Company, its subsidiaries, incorporated in India and audited by us, as on March 31, 2024 taken on record by the respective Board of Directors of such companies and the reports of the other auditors of the subsidiary company incorporated in India and audited by other auditors (as mentioned in "other matters" paragraph above), none of the directors of the Holding Company, its subsidiaries, incorporated in India, are disqualified as on March 31, 2024 from being appointed as a director in terms of Section 164 (2) of the Act.
- With respect to the adequacy of internal financial controls with reference to consolidated financial statements of the Group, incorporated in India, and the operating effectiveness of such controls, refer to our separate report in "Annexure B".
- With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditor's) Rules, 2014 as amended, in our opinion and to the best of our information and according to the explanations given to us:
- The consolidated financial statements disclosed the impact of pending litigations as on March 31, 2024 on the consolidated financial position of the Group.
- The Group did not have any material foreseeable losses on long-term contracts including derivative contracts.
- There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Holding Company, and its subsidiary companies incorporated in India, during the year ended March 31, 2024.
- - On the basis of reports of other auditors of subsidiaries, incorporated in India and not audited by us, and the respective management of the Holding Company and its subsidiaries, which are companies incorporated in India and audited by us, have represented that, to the best of their knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by such companies to or in any other person(s) or entity(ies), including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the intermediary shall, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Holding Company or its subsidiaries ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.
 - On the basis of reports of other auditors of subsidiaries, incorporated in India and not audited by us, and the respective management of the Holding Company and its subsidiaries, which are companies incorporated in India and audited by us, have represented that, to the best of their knowledge and belief, no funds have been received by such companies from any person(s) or entity(ies), including foreign entities ("Funding Parties") with the understanding, whether recorded in writing or otherwise, that the Holding Company or its subsidiaries shall, directly or

indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party (“Ultimate Beneficiaries”) or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries.

- Based on the audit procedures that have been considered reasonable and appropriate in the circumstances performed by us and those performed by other auditors (as mentioned above), nothing has come to our notice that has caused us to believe that the representations under sub-clause (a) and (b) of Rule 11(e) contain any material misstatement.

- The Holding Company has neither declared nor paid any dividend during the year.

- As required by The Companies (Amendment) Act, 2017, in our opinion, according to information, explanations given to us, the remuneration payable by the Group, incorporated in India, is within the limits laid prescribed under Section 197 of the Act and the rules thereunder.

AANNEXURE A TO THE INDEPENDENT AUDITOR’S REPORT ON EVEN DATE ON THE CONSOLIDATED FINANCIAL STATEMENTS OF APOLLO GREEN ENERGY LIMITED (FORMERLY KNOWN AS APOLLO INTERNATIONAL LIMITED)

Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Holding Company has adequate internal financial controls with reference to consolidated financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management’s use of the going concern basis of accounting and, based on the audit evidence obtained and reports of other auditors, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of each company included in the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the companies to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

• Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion.

We communicate with those charged with governance of the Holding Company and such other ' entities included in the consolidated financial statements of which we are the independent auditors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

?

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

ANNEXURE B TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE CONSOLIDATED FINANCIAL STATEMENTS OF APOLLO GREEN ENERGY LIMITED (FORMERLY KNOWN AS APOLLO INTERNATIONAL LIMITED)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

Opinion

In conjunction with our audit of the consolidated financial statements of Apollo Green Energy Limited (Formerly known as Apollo International Limited) (the "Holding Company") as of and for the year ended March 31, 2024, we have audited the internal financial controls with reference to consolidated financial statements of the Holding Company, its subsidiaries, which are companies incorporated in India.

In our opinion, and to the best of our information and according to the explanations given to us, the Holding company, its subsidiary companies, which are companies incorporated in India, have maintained, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as of March 31, 2024 , based on the internal control with reference to financial statements criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India ("ICAI").

Management's Responsibility for Internal Financial Controls

The respective Board of Directors of the Holding company, its subsidiary companies, which are companies incorporated in India, are responsible

for establishing and maintaining internal financial controls based on the internal control with reference to financial statements criteria established by the respective companies considering the essential components of internal control stated in the Guidance Note issued by the ICAI. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the internal financial controls with reference to financial statements of the Holding company, its subsidiary companies, which are companies incorporated in India, based on our audit. We conducted our audit in accordance with the Guidance Note issued by the ICAI and the Standards on Auditing prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to financial statements of the Holding company, its subsidiary companies, which are companies incorporated in India.

Meaning of Internal Financial Controls With reference to Consolidated Financial Statements

Process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the consolidated financial statements.

Inherent Limitations of Internal Financial Controls With reference to Consolidated Financial Statements

Because of the inherent limitations of internal financial controls with reference to consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to consolidated financial statements to future periods are subject to the risk that the internal financial control with reference to consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Other Matter

Our aforesaid report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls with reference to consolidated financial statements in so far as it relates to a subsidiary, which are companies incorporated in India and not audited by us, is based solely on the corresponding reports of the auditors of such companies.

• Corporate Information

Apollo Green Energy Limited ('the Holding Company' or 'the Company') together with its subsidiaries (collectively referred to as the 'Group'), joint ventures, was incorporated dated August 25, 1994 under the provisions of the Companies Act, 2013 having CIN No. U74899DL1994PLC061080.

The Group's main business is to:

- export of diverse range of products and equipment in the field of steel, cement, water treatment plants and other infrastructure projects through its Engineering & Projects Division, manufacturing and export of leather garments and accessories through its Tag Fashion Division and export and domestic sale of tyres, tubes and flaps through its Tyre Tech Global Division.
- undertake and carry on the business of storage, handling, loading, unloading, warehousing, transporting, and repairing of marine containers, developing and operating a container freight station and entering into contracts and arrangements of all kinds with shippers, ship-owners, container owners, container lessees and lessors, shipping agents and transporters.
- render end to end logistics services comprising of activities related to consolidation of cargo, transportation, freight forwarding and customs clearance services to its customers.

These financial statements of the Company for the year ended March 31st, 2024, were approved and adopted by board of directors of the Company in their meeting held on November 28, 2024.

• Significant accounting policies

• Basis of preparation:

The Consolidated financial statements have been prepared in accordance with Indian Accounting Standards [Ind AS] notified under the Companies [Indian Accounting Standards] Rules, 2015, as amended from time to time and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III).

For all periods up to and including the year ended 31st March 2022, the Company has prepared its financial statements in accordance with the accounting standards notified under the section 133 of the Companies Act, 2013, read with relevant rules as amended [Indian GAAP].

The Group has adopted Ind AS as per Companies [Indian Accounting Standards] [Ind AS] Rules, 2015 as notified under section 133 of the Companies Act, 2013 for these financial statements beginning from 1st April 2020. As per the principles of Ind AS 101 "First time adoption of Indian Accounting Standard", the transition date to Ind AS is 1st April 2020 and hence the comparatives for the previous year ended 31st March, 2022 and balances as on 1st April, 2020 have been restated as per the principles of Ind AS, wherever deemed necessary.

• Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company its Subsidiaries, Associates and Joint Venture as at 31 March 2024. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has: -

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee),
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights
- The size of the group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member's financial statements in preparing the consolidated financial statements to ensure conformity with the Group's accounting policies.

Consolidation procedure:

- The financial statements of the Holding Company and its subsidiaries are combined on a line-by-line basis by adding together like items of assets, liabilities, equity, incomes, expense and cash flows, after fully eliminating intra-group balances and intragroup transactions
- Combine like items of assets, liabilities, equity, income, expense, and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the consolidated financial statements at the acquisition date.
- Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary.
- Eliminate in full intragroup assets and liabilities, equity, income, expense, and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the consolidated financial statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.
- In case of foreign subsidiaries, revenue items are consolidated at the average rate prevailing during the year. All Monetary items and non-monetary items form part of assets and liabilities are converted at rates prevailing at the end of the year and actual rate respectively. Any exchange difference arising on consolidation is recognised in the Foreign Currency Translation Reserve (FCTR).
- The audited / unaudited financial statements of foreign subsidiaries / joint ventures / associates have been prepared in accordance with the Generally Accepted Accounting Principle of its Country of incorporation or Ind AS.
- Investment in Associates and Joint Ventures has been accounted under the Equity Method as per Ind AS 28 – Investments in Associates and Joint Ventures. Investments in joint operations are accounted using the Proportionate Consolidation Method as per Ind AS 111 – Joint Arrangements.
- The difference between the proceeds from disposal of investment in subsidiaries and the carrying amount of its assets less liabilities as on the date of disposal is recognised in the Consolidated Statement of Profit and Loss being the profit or loss on disposal of investment in subsidiary.

• The Group accounts for its share of post-acquisition changes in net assets of associates and joint ventures, after eliminating unrealised profits and losses resulting from transactions between the Group and its associates and joint ventures.

• Non-Controlling Interest's share of profit / loss of consolidated subsidiaries for the year is identified and adjusted against the income of the Group in order to arrive at the net income attributable to shareholders of the Company.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

- A change in the ownership interest of a subsidiary, without a loss of control, is accounted as an equity transaction. If the Group loses control over a subsidiary, it:
 - Derecognises the assets (including goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost
 - Derecognises the carrying amount of any non-controlling interests
 - Derecognises the cumulative translation differences recorded in equity
 - Recognises the fair value of the consideration received
 - Recognises the fair value of any investment retained
 - Recognises any surplus or deficit in profit or loss
 - Recognise that distribution of shares of subsidiary to Group in Group's capacity as owners
 - Reclassifies the parent's share of components previously recognised in OCI to profit or loss or transferred directly to retained earnings, if required by other Ind ASs as would be required if the Group had directly disposed of the related assets or liabilities

• Foreign Currency Transactions

Functional & presentational currency

The Consolidated financial statements of the foreign subsidiaries, which are consolidated into the consolidated financial statements of the Group, are prepared and the items included in the consolidated financial statements are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are prepared in the Indian Rupees which is the Group's presentation currency.

The Group has deemed the cumulative translation differences for foreign operations at the date of transition to be zero. Adjustments to give effect to this are recorded against opening equity. After the date of transition, translation differences arising on translation of foreign operations are recognised in other comprehensive income and included in a separate translation reserve within equity.

Transactions and balances

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the transaction. Gains/Losses arising out of fluctuation in foreign exchange rate between the transaction date and settlement date are recognised in the Statement of Profit and Loss.

All monetary assets and liabilities in foreign currencies are restated at the year end at the exchange rate prevailing at the year end and the exchange differences are recognised in the Statement of Profit and Loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

Conversion

Functional and reporting currencies of foreign operations are different from the reporting currency of the Holding Group. For all the foreign operations of the Group, all assets and liabilities (excluding share capital and opening reserves and surplus) are translated into INR using the exchange rate prevailing at the reporting date. Share capital, reserves and surplus are carried at historical cost. Revenues, costs and expenses are translated using the weighted average exchange rate during the reporting period. The resultant currency translation difference is recognised as foreign currency translation reserve under the head 'Other Equity'. On the disposal of a foreign operation, all of the accumulated exchange differences in respect of that operation attributable to the Group are reclassified to the consolidated statement of profit and loss.

- Current vs non-current classifications:

An operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle. The projects business comprises long-term contracts which have an operating cycle exceeding one year. For classification of current assets and liabilities related to projects business, the Group uses the duration of the contract as its operating cycle.

The Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it satisfies below criteria:

- Expected to be realised or intended to be sold or consumed in a normal operating cycle;
- Held for primary purpose of trading.
- Expected to be realised within twelve months after reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current assets.

A Liability is classified as current when it satisfies below criteria:

- Expected to settle the liability in normal operating cycle;
- Help primarily for the purpose of trading;
- Due to be settled within twelve months after reporting period; or
- There is no unconditional right to defer the settlement of liability for at least twelve months after reporting period.

All other liabilities are classified as non-current liabilities.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

- Property, plant and equipment (PPE)

Property, Plant and Equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Cost comprises the purchase price, including import duties and non-refundable purchase taxes, and any directly attributable cost of bringing the asset to its working condition for its intended use. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to Statement of Profit and Loss during the year in which they are incurred.

Gains or losses arising from de-recognition of a property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognized.

PPE not ready for the intended use on the date of the Balance Sheet are disclosed as "capital work-in-progress".

- Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

- Depreciation/amortization

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value which is taken as nil.

Depreciation is provided on the Straight Line Method as per the rates derived from the balance useful lives of relevant classes of assets prescribed in Schedule II of Companies Act, 2013. Depreciation has been provided on pro-rata basis from the date the assets are put to use during the financial year. In respect of asset sold or disposed off during the year, depreciation is provided till the date of sale/disposal/adjustments of the assets.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The estimated useful lives of assets and residual values are reviewed regularly and, when necessary, and adjusted prospectively, if appropriate

Leasehold improvements are amortized over the lease period, which corresponds with the useful lives of the assets.

The company amortized intangible assets over their estimated useful lives using the straight-line method (SLM).

- Lease

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Group as a lessor

Lease income from operating leases where the Group is a lessor is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

- Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis from the commencement date over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (O) Impairment of non-financial assets.

- Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liabilities and Right-of-use assets have been presented as a separate line in the balance sheet. Lease payments have been classified as cash used in financing activities.

- Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases of all assets that have a lease term of 12 months or less and leases of low-value assets. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease.

- Investment Property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

Investment properties are subsequently measured at cost less depreciation. Investment properties are depreciated using the straight-line method over their estimated useful lives.

- Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

- Financial asset

- Initial recognition and measurement

All financial assets are initially recognized at fair value. Transaction costs will be considered as part of the cost of acquisition that are directly attributable to the acquisition or issue of financial assets, which are measured through Fair Value Through Profit and Loss (FVTPL). Purchase and sale of financial assets are recognised using trade date accounting.

Fair value Measurement

The Group measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer liability takes place either:

? In the principal market for the asset or liability, or

? In the absence of a principal market, in the most advantageous market for the asset or liability accessible to the Company.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group business model for managing them. All financial assets are recognised initially at fair value plus transaction costs that are attributable to the acquisition of the financial assets in the case of financial assets not recorded at fair value through profit or loss, however transaction costs directly attributable to the acquisition of financial assets at fair value through profit and loss are immediately recognised in the statement of profit and loss. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

- Subsequent measurement

- Financial assets measured at amortised cost

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the

Contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- Financial assets measured at Fair Value Through Other Comprehensive Income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For Equity investments the Group has elected to recognize changes in the fair value of certain investments in equity securities in other comprehensive income. These changes are accumulated within the FVOCI equity investments reserve within equity.

- Financial Assets measured at Fair Value Through Profit or Loss (FVTPL)

A financial asset which is not classified in any of the above categories is measured at FVTPL.

Investment in equity instruments issued by subsidiary, associate and joint venture companies are measured at cost less impairment.

- Loans to employees and other entities

Loans given to employees and other entities are repayable to the company on demand and hence are carried at cost in the financial statements.

- Impairment of financial assets

The Company recognizes loss allowance using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all financial assets with contractual cash flows other than trade receivable, ECLs are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of ECLs (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised as an impairment gain or loss in the Statement of Profit and Loss.

- Financial liabilities

- Financial liabilities: initial recognition and measurement

All financial liabilities are recognized at fair value and in case of borrowings, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

- Financial liabilities: subsequent measurement

Financial liabilities are carried at amortized cost using the Effective interest rate (EIR) method.

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

c) Loans and borrowings

This is the category most relevant to the Group. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in statement of profit and loss when the liabilities are derecognised as well as through the EIR amortization process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

- De-recognition of financial instruments

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the

Company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

- Offsetting

Financial assets and financial liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Group has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

- Employee benefits:

- Short term employee benefits

Employee benefits such as salaries, wages, short-term compensated absences, bonus, ex-gratia and performance-linked rewards falling due wholly within twelve months of rendering the service are classified as short-term employee benefits and are expensed in the period in which the employee renders the service.

- Post-employment benefits

- Defined contribution plan:

- Provident fund

The Group superannuation scheme, state governed provident fund scheme, employee state insurance scheme and employee pension scheme are defined contribution plans. The contribution paid/payable under the schemes is recognised during the period in which the employee renders the service. The Group has no obligation, other than the contribution payable to the provident fund. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

- Defined benefits plan:

The Group provides for gratuity, a defined benefit plan (the 'Gratuity Plan') covering eligible employees in accordance with the Payment of Gratuity Act, 1972. Gratuity liability is a defined benefit obligation and is provided on the basis of its actuarial valuation based on the projected unit credit method made at each Balance Sheet date. The Company funds gratuity benefits for its employees within the limits prescribed under The Payment of Gratuity (Amendment) Act, 2018 through contributions to a Scheme administered by the Life Insurance Corporation of India ('LIC').

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

- Other long-term employee benefit obligations

Compensated absences: The employees can carry-forward a portion of the unutilised accrued compensated absences and utilise it in future service periods or receive cash compensation on termination of employment. Since, the compensated absences do not fall due wholly within twelve months after the end of the period in which the employees render the related service and are also not expected to be utilised wholly within twelve months after the end of such period, the benefit is classified as a long-term employee benefit. The Group records an obligation for such compensated absences in the period in which the employee renders the services that increase their entitlement. The obligation is measured on the basis of independent actuarial valuation using the projected unit credit method on the Balance Sheet date.

- Income taxes

Tax expenses comprise of current and deferred tax.

- Current Tax:

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

- Deferred Tax:

Deferred tax is recognised on temporary difference between the carrying amount of assets and liabilities in the Financial Statements and the corresponding tax based used in computation of taxable profit.

Deferred tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilized.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

- Inventories

Inventories are valued after providing for obsolescence, as under:

- Raw materials, components, construction materials, stores, spares and loose tools at lower of weighted average cost or net realisable value. However, these items are considered to be realisable at cost if the finished products in which they will be used, are expected to be sold at or above cost. Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition
- Finished goods and stock-in-trade (in respect of goods acquired for trading) at lower of weighted average cost or net realisable value. Cost includes costs of purchases, costs of conversion and other costs incurred in bringing the inventories to their present location. Taxes which are subsequently recoverable from taxation authorities are not included in the cost.

Assessment of net realisable value is made at each reporting period end and when the circumstances that previously caused inventories to be written-down below cost no longer exist or when there is clear evidence of an increase in net realisable value because of changed economic circumstances, the write-down, if any, in the past period is reversed to the extent of the original amount written-down so that the resultant carrying amount is the lower of the cost and the revised net realisable value.

- Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

The Company transfers control of a good or service over time and therefore satisfies a performance obligation and recognises revenue over a period of time if one of the following criteria is met:

- the customer simultaneously consumes the benefit of the Company's performance or
- the customer controls the asset as it is being created/enhanced by the Company's performance or
- there is no alternative use of the asset and the Company has either explicit or implicit right of payment considering legal precedents,

In all other cases, performance obligation is considered as satisfied at a point in time.

The revenue is recognised to the extent of transaction price allocated to the performance obligation satisfied. Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer excluding amounts collected on behalf of a third party. The Company includes variable consideration as part of transaction price when there is a basis to reasonably estimate the amount of the variable consideration and when it is probable that a significant reversal of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is resolved. Variable consideration is estimated using the expected value

method or most likely amount as appropriate in a given circumstance. Payment terms agreed with a customer are as per business practice and the financing component, if significant, is separated from the transaction price and accounted as interest income. Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in profit or loss immediately in the period in which such costs are incurred. Incremental costs of obtaining a contract, if any, and costs incurred to fulfil a contract are amortised over the period of execution of the contract in proportion to the progress measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Significant judgments are used in:

- Determining the revenue to be recognised in case of performance obligation satisfied over a period of time; revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation.
- Determining the expected losses, which are recognised in the period in which such losses become probable based on the expected total contract cost as at the reporting date.
- Determining the method to be applied to arrive at the variable consideration requiring an adjustment to the transaction price

• Revenue from operations

Revenue includes adjustments made towards liquidated damages and variation wherever applicable. Escalation and other claims, which are not ascertainable/acknowledged by customers are not taken into account.

- Revenue from sale of manufactured and traded goods including contracts for supply/commissioning of complex plant and equipment is recognised as follows:

Revenue is recognised when the control of the same is transferred to the customer and it is probable that the Company will collect the consideration to which it is entitled for the exchanged goods. Revenue from commissioning of complex plant and equipment is recognised either 'over time' or 'in time' based on an assessment of the transfer of control as per the terms of the contract.

• Revenue from construction/project related activity is recognised as follows:

- Cost plus contracts: Revenue from cost plus contracts is recognised over time and is determined with reference to the extent performance obligations have been satisfied. The amount of transaction price allocated to the performance obligations satisfied represents the recoverable costs incurred during the period plus the margin as agreed with the customer.
- Fixed price contracts: Contract revenue is recognised over time to the extent of performance obligation satisfied and control is transferred to the customer. Contract revenue is recognised at allocable transaction price which represents the cost of work performed on the contract plus proportionate margin, using the percentage of completion method. Percentage of completion is the proportion of cost of work performed to-date, to the total estimated contract costs.

For contracts where the aggregate of contract cost incurred to date plus recognised profits (or minus recognised losses as the case may be) exceeds the progress billing, the surplus is shown as contract asset and termed as "Due from customers". For contracts where progress billing exceeds the aggregate of contract costs incurred to-date plus recognised profits (or minus recognised losses, as the case may be), the surplus is shown as contract liability and termed as "Due to customers". Amounts received before the related work is performed are disclosed in the Balance Sheet as contract liability and termed as "Advances from customer". The amounts billed on customer for work performed and are unconditionally due for payment i.e. only passage of time is required before payment falls due, are disclosed in the Balance Sheet as trade receivables. The amount of retention money held by the customers pending completion of performance milestone is disclosed as part of contract asset and is reclassified as trade receivables when it becomes due for payment. Impairment loss (termed as provision for foreseeable losses in the financial statements) is recognised in profit or loss to the extent the carrying amount of the contract asset exceeds the remaining amount of consideration that the Company expects to receive towards remaining performance obligations (after deducting the costs that relate directly to fulfill such remaining performance obligations). The Company recognises impairment loss (termed as provision for expected credit loss on contract assets in the financial statements) on account of credit risk in respect of a contract asset using expected credit loss model on similar basis as applicable to trade receivables.

- Revenue from rendering of services is recognised over time as the customer receives the benefit of the Company's performance and the Company has an enforceable right to payment for services transferred. Unbilled revenue represents value of services performed in accordance with the contract terms but not billed

• Container Freight station services

- Income from cargo handling services is recognised as and when the related services are performed as per the contractual terms agreed with the customers. Revenue from providing services is recognised in the accounting period in which the services are rendered.
- Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of indirect taxes, trade allowances, rebates and amounts collected on behalf of third parties and is not recognised in instances where there is uncertainty with regard to ultimate collection. In such cases revenue is recognised on reasonable certainty of collection.
- Revenue from storage and warehousing is recognised prorata based on the period the container is kept in the Container freight station. However,

in case of long standing containers, the revenue is accounted on the accrual basis to the extent, it is not unreasonable to expect ultimate collection.

- In an agency relationship, the commission income / service fee revenue is recorded on a net basis (net of cost incurred) and cost incurred is netted off with the relevant expenses incurred, since these are incurred on behalf of other parties.

- Multimodal transport operations

- Revenue from Export service is recognised on sailing of vessel and revenue from import services is recognised upon rendering of related services.

- Third Party Logistics income
- Third party logistic service charges and management fees are recognized as and when the service is performed as per contractual terms.
- Income from Transportation service are recognised as and when the services are performed as per Contractual terms.
- Reimbursement of cost is netted off with the relevant expenses incurred since the same are incurred on behalf of the customer.

- Other income

- Interest income on investments and loans is accrued on a time basis by reference to the principal outstanding and the effective interest rate including interest on investments classified as fair value through profit or loss or fair value through other comprehensive income. Interest receivable on customer dues is recognised as income in the Statement of Profit and Loss on accrual basis provided there is no uncertainty of realisation.

- Dividend income is accounted in the period in which the right to receive the same is established.

- Government grants, which are revenue in nature and are towards compensation for the qualifying costs incurred by the Company, are recognised as other income/reduced from underlying expenses in profit or loss in the period in which such costs are incurred. Government grants related to an asset are reduced from the cost of an asset until the asset is ready to use and the grant post that is presented as deferred income. Subsequently the grant is recognised as income in profit or loss on a systematic basis over the expected useful life of the related asset. Government grant receivable in the form of duty credit scrips is recognised as other income in the Statement of Profit and Loss in the period in which the application is made to the government authorities and to the extent there is no uncertainty towards its receipt.

- Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

- Onerous Contract

If the Group has a contract that is onerous, the present obligation under the contract is recognized and measured as a provision. However, before a separate provision for an onerous contract is established, the Group recognizes any impairment loss that has occurred on assets dedicated to that contract. An onerous contract is a contract under which the unavoidable costs (i.e. the costs that the Company cannot avoid because it has the contract) of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it.

- Borrowing costs:

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as a part of the cost of assets during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Borrowing cost consist of interest (calculated using effective rate of interest method) and other cost that an entity incurred in connection with the borrowing cost.

Other borrowing costs are expensed in the period in which they are incurred.

- Provisions, contingent liabilities & contingent assets

General

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

Long-term provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money. Short term provisions are carried at their redemption value and are not offset against receivables from reimbursements.

Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Contingent Assets

A contingent asset is not recognized unless it becomes virtually certain that an inflow of economic benefits will arise. When an inflow of economic benefits is probable, contingent assets are disclosed in the financial statements

- Impairment of Assets:

As at the end of each financial year, the carrying amounts of PPE, investment property, intangible assets and investments in subsidiary are reviewed to determine whether there is any indication that those assets have suffered an impairment loss. If such indication exists, PPE, investment property and intangible assets are tested for impairment so as to determine the impairment loss, if any. Intangible assets with indefinite life are tested for impairment each year. Impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is determined:

- in the case of an individual asset, at the higher of the fair value less costs to sell and the value-in-use; and
- in the case of a cash generating unit (the smallest identifiable group of assets that generates independent cash flows), at the higher of the cash generating unit's fair value less costs to sell and the value-in-use.

The amount of value-in-use is determined as the present value of estimated future cash flows from the continuing use of an asset, which may vary based on the future performance of the Company and from its disposal at the end of its useful life. For this purpose, the discount rate (pre-tax) is determined based on the weighted average cost of capital of the company suitably adjusted for risks specified to the estimated cash flows of the asset. If recoverable amount of an asset (or cash generating unit) is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount. When an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount, such that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

- Foreign currency transactions

Foreign currency transactions are recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

Foreign currency transactions other than export sales are recorded at rates of exchange prevailing on the date of transaction. Export sales are accounted for at monthly average exchange rates. Monetary assets and liabilities denominated in foreign currencies as at the balance sheet date are translated at the rate of exchange prevailing at the year-end. Exchange differences arising on actual payments / realizations and year-end restatements are dealt with in the Statement of Profit and Loss.

Monetary items denominated in foreign currency are revalued at the rates of exchange as on the Balance Sheet date and Exchange differences arising on settlement or translation of monetary items are recognised in statement of profit and loss. Exchange differences on foreign currency borrowings, are accounted for and disclosed under 'finance cost'.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the date of the transaction.

- Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

- Segment reporting

Operating segments are those components of the business whose operating results are regularly reviewed by the chief operating decision making body in the Company to make decisions for performance assessment and resource allocation. The reporting of segment information is the same as provided to the management for the purpose of the performance assessment and resource allocation to the segments. Segment accounting policies are in line with the accounting policies of the Company. In addition, the following specific accounting policies have been followed for segment reporting:

- Segment revenue includes sales and other operational revenue directly identifiable with/allocable to the segment including inter segment revenue.
- Expenses that are directly identifiable with/allocable to segments are considered for determining the segment result.
- Most of the common costs are allocated to segments mainly on the basis of the respective segment revenue estimated at the beginning of the reporting period.
- Income which relates to the Company as a whole and not allocable to segments is included in "unallocable corporate income/(expenditure)(net)".
- Segment result represents profit before interest and tax and includes margins on inter-segment capital jobs, which are reduced in arriving at the profit before tax of the Company.
- Segment result includes the finance costs incurred on interest bearing advances with corresponding credit included in "unallocable corporate income/(expenditure)(net)".
- Segment results have not been adjusted for any exceptional item.
- Segment assets and liabilities include those directly identifiable with the respective segments. Unallocable corporate assets and liabilities represent the assets and liabilities that relate to the Company as a whole.
- Segment non-cash expenses forming part of segment expenses and is allocated to the segment.
- Segment revenue resulting from transactions with other business segments is accounted on the basis of transfer price which are either determined to yield a desired margin or agreed on a negotiated basis.

- Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss [excluding other comprehensive income] for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share are the net profit after tax for the year. The weighted average numbers of equity shares outstanding during the period are adjusted for events of bonus issue and sub-division of shares.

For the purpose of calculating diluted earnings per share, the net profit or loss [excluding other comprehensive income] for the year attributable to equity share holders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

- Convertible preference shares

Convertible preference shares are separated into liability and equity components based on the terms of the contract.

On issuance of the convertible preference shares, the fair value of the liability component is determined using a market rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption.

The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity since conversion option meets Ind AS 32 criteria for fixed to fixed classification. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not remeasured in subsequent years.

Transaction costs are apportioned between the liability and equity components of the convertible preference shares based on the allocation of proceeds to the liability and equity components when the instruments are initially recognised.

- Recent accounting pronouncements and changes in accounting standards

Ministry of Affairs (“MCA”) notified new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On 23rd March 2022, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2022 applicable from April 2022, as below:

Ind AS 103 – Reference to Conceptual Framework The amendments specify that to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Conceptual Framework for Financial Reporting under Indian Accounting Standards (Conceptual Framework) issued by the Institute of Chartered Accountants of India at the acquisition date. These changes do not significantly change the requirements of Ind AS 103. The Group does not expect the amendment to have any significant impact in its financial statements.

Ind AS 16 - Proceeds before intended use the amendments mainly prohibit an entity from deducting from the cost of property, plant and equipment amounts received from selling items produced while the group is preparing the asset for its intended use. Instead, an entity will recognise such sales proceeds and related cost in statement of profit or loss. The Group does not expect the amendments to have any impact in its recognition of its property, plant and equipment in its financial statements.

Ind AS 37- Provisions, Contingent Liabilities and contingent assets the amendment specifies that the cost of fulfilling a contract comprises the costs that relate directly to the contract. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property plant and equipment used in fulfilling the contract). The effective date for adoption of this amendment is annual periods beginning on or after April 1 2022, although early adoption is permitted. The Company has evaluated the amendment and the impact is not expected to be material.

- Use of judgements, estimates and assumptions

In preparing these standalone financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Assumptions and estimation uncertainties

Assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment recognised in the standalone financial statements are as under :

- measurement of useful life, residual values and impairment of property, plant and equipment,
- recognition of deferred tax assets: availability of future taxable profit against which temporary differences shall be deductible,
- measurement of defined benefit obligations and planned assets: key actuarial assumptions, recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources,
- impairment of financial assets and non-financial assets,
- revenue and margin recognition on construction and / or long term service contracts and related provision.

Textual information (7)

Disclosure of significant accounting policies [Text Block]

• Corporate Information

Apollo Green Energy Limited ('the Holding Company' or 'the Company') together with its subsidiaries (collectively referred to as the 'Group'), joint ventures, was incorporated dated August 25, 1994 under the provisions of the Companies Act, 2013 having CIN No. U74899DL1994PLC061080.

The Group's main business is to:

- export of diverse range of products and equipment in the field of steel, cement, water treatment plants and other infrastructure projects through its Engineering & Projects Division, manufacturing and export of leather garments and accessories through its Tag Fashion Division and export and domestic sale of tyres, tubes and flaps through its Tyre Tech Global Division.
- undertake and carry on the business of storage, handling, loading, unloading, warehousing, transporting, and repairing of marine containers, developing and operating a container freight station and entering into contracts and arrangements of all kinds with shippers, ship-owners, container owners, container lessees and lessors, shipping agents and transporters.
- render end to end logistics services comprising of activities related to consolidation of cargo, transportation, freight forwarding and customs clearance services to its customers.

These financial statements of the Company for the year ended March 31st, 2024, were approved and adopted by board of directors of the Company in their meeting held on November 28, 2024.

• Significant accounting policies

• Basis of preparation:

The Consolidated financial statements have been prepared in accordance with Indian Accounting Standards [Ind AS] notified under the Companies [Indian Accounting Standards] Rules, 2015, as amended from time to time and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III).

For all periods up to and including the year ended 31st March 2022, the Company has prepared its financial statements in accordance with the accounting standards notified under the section 133 of the Companies Act, 2013, read with relevant rules as amended [Indian GAAP].

The Group has adopted Ind AS as per Companies [Indian Accounting Standards] [Ind AS] Rules, 2015 as notified under section 133 of the Companies Act, 2013 for these financial statements beginning from 1st April 2020. As per the principles of Ind AS 101 "First time adoption of Indian Accounting Standard", the transition date to Ind AS is 1st April 2020 and hence the comparatives for the previous year ended 31st March, 2022 and balances as on 1st April, 2020 have been restated as per the principles of Ind AS, wherever deemed necessary.

• Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company its Subsidiaries, Associates and Joint Venture as at 31 March 2024. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has: -

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee),
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights
- The size of the group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member's financial statements in preparing the consolidated financial statements to ensure conformity with the Group's accounting policies.

Consolidation procedure:

- The financial statements of the Holding Company and its subsidiaries are combined on a line-by-line basis by adding together like items of assets, liabilities, equity, incomes, expense and cash flows, after fully eliminating intra-group balances and intragroup transactions
- Combine like items of assets, liabilities, equity, income, expense, and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the consolidated financial statements at the acquisition date.
- Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary.
- Eliminate in full intragroup assets and liabilities, equity, income, expense, and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the consolidated financial statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.
- In case of foreign subsidiaries, revenue items are consolidated at the average rate prevailing during the year. All Monetary items and non-monetary items form part of assets and liabilities are converted at rates prevailing at the end of the year and actual rate respectively. Any exchange difference arising on consolidation is recognised in the Foreign Currency Translation Reserve (FCTR).
- The audited / unaudited financial statements of foreign subsidiaries / joint ventures / associates have been prepared in accordance with the Generally Accepted Accounting Principle of its Country of incorporation or Ind AS.
- Investment in Associates and Joint Ventures has been accounted under the Equity Method as per Ind AS 28 – Investments in Associates and Joint Ventures. Investments in joint operations are accounted using the Proportionate Consolidation Method as per Ind AS 111 – Joint Arrangements.
- The difference between the proceeds from disposal of investment in subsidiaries and the carrying amount of its assets less liabilities as on the date of disposal is recognised in the Consolidated Statement of Profit and Loss being the profit or loss on disposal of investment in subsidiary.

• The Group accounts for its share of post-acquisition changes in net assets of associates and joint ventures, after eliminating unrealised profits and losses resulting from transactions between the Group and its associates and joint ventures.

• Non-Controlling Interest's share of profit / loss of consolidated subsidiaries for the year is identified and adjusted against the income of the Group in order to arrive at the net income attributable to shareholders of the Company.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

- A change in the ownership interest of a subsidiary, without a loss of control, is accounted as an equity transaction. If the Group loses control over a subsidiary, it:
 - Derecognises the assets (including goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost
 - Derecognises the carrying amount of any non-controlling interests
 - Derecognises the cumulative translation differences recorded in equity
 - Recognises the fair value of the consideration received
 - Recognises the fair value of any investment retained
 - Recognises any surplus or deficit in profit or loss
 - Recognise that distribution of shares of subsidiary to Group in Group's capacity as owners
 - Reclassifies the parent's share of components previously recognised in OCI to profit or loss or transferred directly to retained earnings, if required by other Ind ASs as would be required if the Group had directly disposed of the related assets or liabilities

• Foreign Currency Transactions

Functional & presentational currency

The Consolidated financial statements of the foreign subsidiaries, which are consolidated into the consolidated financial statements of the Group, are prepared and the items included in the consolidated financial statements are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are prepared in the Indian Rupees which is the Group's presentation currency.

The Group has deemed the cumulative translation differences for foreign operations at the date of transition to be zero. Adjustments to give effect to this are recorded against opening equity. After the date of transition, translation differences arising on translation of foreign operations are recognised in other comprehensive income and included in a separate translation reserve within equity.

Transactions and balances

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the transaction. Gains/Losses arising out of fluctuation in foreign exchange rate between the transaction date and settlement date are recognised in the Statement of Profit and Loss.

All monetary assets and liabilities in foreign currencies are restated at the year end at the exchange rate prevailing at the year end and the exchange differences are recognised in the Statement of Profit and Loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

Conversion

Functional and reporting currencies of foreign operations are different from the reporting currency of the Holding Group. For all the foreign operations of the Group, all assets and liabilities (excluding share capital and opening reserves and surplus) are translated into INR using the exchange rate prevailing at the reporting date. Share capital, reserves and surplus are carried at historical cost. Revenues, costs and expenses are translated using the weighted average exchange rate during the reporting period. The resultant currency translation difference is recognised as foreign currency translation reserve under the head 'Other Equity'. On the disposal of a foreign operation, all of the accumulated exchange differences in respect of that operation attributable to the Group are reclassified to the consolidated statement of profit and loss.

- Current vs non-current classifications:

An operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle. The projects business comprises long-term contracts which have an operating cycle exceeding one year. For classification of current assets and liabilities related to projects business, the Group uses the duration of the contract as its operating cycle.

The Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it satisfies below criteria:

- Expected to be realised or intended to be sold or consumed in a normal operating cycle;
- Held for primary purpose of trading.
- Expected to be realised within twelve months after reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current assets.

A Liability is classified as current when it satisfies below criteria:

- Expected to settle the liability in normal operating cycle;
- Help primarily for the purpose of trading;
- Due to be settled within twelve months after reporting period; or
- There is no unconditional right to defer the settlement of liability for at least twelve months after reporting period.

All other liabilities are classified as non-current liabilities.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

- Property, plant and equipment (PPE)

Property, Plant and Equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Cost comprises the purchase price, including import duties and non-refundable purchase taxes, and any directly attributable cost of bringing the asset to its working condition for its intended use. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to Statement of Profit and Loss during the year in which they are incurred.

Gains or losses arising from de-recognition of a property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognized.

PPE not ready for the intended use on the date of the Balance Sheet are disclosed as "capital work-in-progress".

- Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

- Depreciation/amortization

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value which is taken as nil.

Depreciation is provided on the Straight Line Method as per the rates derived from the balance useful lives of relevant classes of assets prescribed in Schedule II of Companies Act, 2013. Depreciation has been provided on pro-rata basis from the date the assets are put to use during the financial year. In respect of asset sold or disposed off during the year, depreciation is provided till the date of sale/disposal/adjustments of the assets.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The estimated useful lives of assets and residual values are reviewed regularly and, when necessary, and adjusted prospectively, if appropriate

Leasehold improvements are amortized over the lease period, which corresponds with the useful lives of the assets.

The company amortized intangible assets over their estimated useful lives using the straight-line method (SLM).

- Lease

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Group as a lessor

Lease income from operating leases where the Group is a lessor is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

- Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis from the commencement date over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (O) Impairment of non-financial assets.

- Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liabilities and Right-of-use assets have been presented as a separate line in the balance sheet. Lease payments have been classified as cash used in financing activities.

- Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases of all assets that have a lease term of 12 months or less and leases of low-value assets. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease.

- Investment Property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

Investment properties are subsequently measured at cost less depreciation. Investment properties are depreciated using the straight-line method over their estimated useful lives.

- Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

- Financial asset

- Initial recognition and measurement

All financial assets are initially recognized at fair value. Transaction costs will be considered as part of the cost of acquisition that are directly attributable to the acquisition or issue of financial assets, which are measured through Fair Value Through Profit and Loss (FVTPL). Purchase and sale of financial assets are recognised using trade date accounting.

Fair value Measurement

The Group measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer liability takes place either:

? In the principal market for the asset or liability, or

? In the absence of a principal market, in the most advantageous market for the asset or liability accessible to the Company.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group business model for managing them. All financial assets are recognised initially at fair value plus transaction costs that are attributable to the acquisition of the financial assets in the case of financial assets not recorded at fair value through profit or loss, however transaction costs directly attributable to the acquisition of financial assets at fair value through profit and loss are immediately recognised in the statement of profit and loss. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

- Subsequent measurement

- Financial assets measured at amortised cost

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the

Contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- Financial assets measured at Fair Value Through Other Comprehensive Income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For Equity investments the Group has elected to recognize changes in the fair value of certain investments in equity securities in other comprehensive income. These changes are accumulated within the FVOCI equity investments reserve within equity.

- Financial Assets measured at Fair Value Through Profit or Loss (FVTPL)

A financial asset which is not classified in any of the above categories is measured at FVTPL.

Investment in equity instruments issued by subsidiary, associate and joint venture companies are measured at cost less impairment.

- Loans to employees and other entities

Loans given to employees and other entities are repayable to the company on demand and hence are carried at cost in the financial statements.

- Impairment of financial assets

The Company recognizes loss allowance using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all financial assets with contractual cash flows other than trade receivable, ECLs are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of ECLs (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised as an impairment gain or loss in the Statement of Profit and Loss.

- Financial liabilities

- Financial liabilities: initial recognition and measurement

All financial liabilities are recognized at fair value and in case of borrowings, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

- Financial liabilities: subsequent measurement

Financial liabilities are carried at amortized cost using the Effective interest rate (EIR) method.

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

c) Loans and borrowings

This is the category most relevant to the Group. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in statement of profit and loss when the liabilities are derecognised as well as through the EIR amortization process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

- De-recognition of financial instruments

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the

Company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

- Offsetting

Financial assets and financial liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Group has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

- Employee benefits:

- Short term employee benefits

Employee benefits such as salaries, wages, short-term compensated absences, bonus, ex-gratia and performance-linked rewards falling due wholly within twelve months of rendering the service are classified as short-term employee benefits and are expensed in the period in which the employee renders the service.

- Post-employment benefits

- Defined contribution plan:

- Provident fund

The Group superannuation scheme, state governed provident fund scheme, employee state insurance scheme and employee pension scheme are defined contribution plans. The contribution paid/payable under the schemes is recognised during the period in which the employee renders the service. The Group has no obligation, other than the contribution payable to the provident fund. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

- Defined benefits plan:

The Group provides for gratuity, a defined benefit plan (the 'Gratuity Plan') covering eligible employees in accordance with the Payment of Gratuity Act, 1972. Gratuity liability is a defined benefit obligation and is provided on the basis of its actuarial valuation based on the projected unit credit method made at each Balance Sheet date. The Company funds gratuity benefits for its employees within the limits prescribed under The Payment of Gratuity (Amendment) Act, 2018 through contributions to a Scheme administered by the Life Insurance Corporation of India ('LIC').

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

- Other long-term employee benefit obligations

Compensated absences: The employees can carry-forward a portion of the unutilised accrued compensated absences and utilise it in future service periods or receive cash compensation on termination of employment. Since, the compensated absences do not fall due wholly within twelve months after the end of the period in which the employees render the related service and are also not expected to be utilised wholly within twelve months after the end of such period, the benefit is classified as a long-term employee benefit. The Group records an obligation for such compensated absences in the period in which the employee renders the services that increase their entitlement. The obligation is measured on the basis of independent actuarial valuation using the projected unit credit method on the Balance Sheet date.

- Income taxes

Tax expenses comprise of current and deferred tax.

- Current Tax:

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

- Deferred Tax:

Deferred tax is recognised on temporary difference between the carrying amount of assets and liabilities in the Financial Statements and the corresponding tax based used in computation of taxable profit.

Deferred tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilized.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

- Inventories

Inventories are valued after providing for obsolescence, as under:

- Raw materials, components, construction materials, stores, spares and loose tools at lower of weighted average cost or net realisable value. However, these items are considered to be realisable at cost if the finished products in which they will be used, are expected to be sold at or above cost. Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition
- Finished goods and stock-in-trade (in respect of goods acquired for trading) at lower of weighted average cost or net realisable value. Cost includes costs of purchases, costs of conversion and other costs incurred in bringing the inventories to their present location. Taxes which are subsequently recoverable from taxation authorities are not included in the cost.

Assessment of net realisable value is made at each reporting period end and when the circumstances that previously caused inventories to be written-down below cost no longer exist or when there is clear evidence of an increase in net realisable value because of changed economic circumstances, the write-down, if any, in the past period is reversed to the extent of the original amount written-down so that the resultant carrying amount is the lower of the cost and the revised net realisable value.

- Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

The Company transfers control of a good or service over time and therefore satisfies a performance obligation and recognises revenue over a period of time if one of the following criteria is met:

- the customer simultaneously consumes the benefit of the Company's performance or
- the customer controls the asset as it is being created/enhanced by the Company's performance or
- there is no alternative use of the asset and the Company has either explicit or implicit right of payment considering legal precedents,

In all other cases, performance obligation is considered as satisfied at a point in time.

The revenue is recognised to the extent of transaction price allocated to the performance obligation satisfied. Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer excluding amounts collected on behalf of a third party. The Company includes variable consideration as part of transaction price when there is a basis to reasonably estimate the amount of the variable consideration and when it is probable that a significant reversal of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is resolved. Variable consideration is estimated using the expected value

method or most likely amount as appropriate in a given circumstance. Payment terms agreed with a customer are as per business practice and the financing component, if significant, is separated from the transaction price and accounted as interest income. Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in profit or loss immediately in the period in which such costs are incurred. Incremental costs of obtaining a contract, if any, and costs incurred to fulfil a contract are amortised over the period of execution of the contract in proportion to the progress measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Significant judgments are used in:

- Determining the revenue to be recognised in case of performance obligation satisfied over a period of time; revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation.
- Determining the expected losses, which are recognised in the period in which such losses become probable based on the expected total contract cost as at the reporting date.
- Determining the method to be applied to arrive at the variable consideration requiring an adjustment to the transaction price

• Revenue from operations

Revenue includes adjustments made towards liquidated damages and variation wherever applicable. Escalation and other claims, which are not ascertainable/acknowledged by customers are not taken into account.

- Revenue from sale of manufactured and traded goods including contracts for supply/commissioning of complex plant and equipment is recognised as follows:

Revenue is recognised when the control of the same is transferred to the customer and it is probable that the Company will collect the consideration to which it is entitled for the exchanged goods. Revenue from commissioning of complex plant and equipment is recognised either 'over time' or 'in time' based on an assessment of the transfer of control as per the terms of the contract.

• Revenue from construction/project related activity is recognised as follows:

- Cost plus contracts: Revenue from cost plus contracts is recognised over time and is determined with reference to the extent performance obligations have been satisfied. The amount of transaction price allocated to the performance obligations satisfied represents the recoverable costs incurred during the period plus the margin as agreed with the customer.
- Fixed price contracts: Contract revenue is recognised over time to the extent of performance obligation satisfied and control is transferred to the customer. Contract revenue is recognised at allocable transaction price which represents the cost of work performed on the contract plus proportionate margin, using the percentage of completion method. Percentage of completion is the proportion of cost of work performed to-date, to the total estimated contract costs.

For contracts where the aggregate of contract cost incurred to date plus recognised profits (or minus recognised losses as the case may be) exceeds the progress billing, the surplus is shown as contract asset and termed as "Due from customers". For contracts where progress billing exceeds the aggregate of contract costs incurred to-date plus recognised profits (or minus recognised losses, as the case may be), the surplus is shown as contract liability and termed as "Due to customers". Amounts received before the related work is performed are disclosed in the Balance Sheet as contract liability and termed as "Advances from customer". The amounts billed on customer for work performed and are unconditionally due for payment i.e. only passage of time is required before payment falls due, are disclosed in the Balance Sheet as trade receivables. The amount of retention money held by the customers pending completion of performance milestone is disclosed as part of contract asset and is reclassified as trade receivables when it becomes due for payment. Impairment loss (termed as provision for foreseeable losses in the financial statements) is recognised in profit or loss to the extent the carrying amount of the contract asset exceeds the remaining amount of consideration that the Company expects to receive towards remaining performance obligations (after deducting the costs that relate directly to fulfill such remaining performance obligations). The Company recognises impairment loss (termed as provision for expected credit loss on contract assets in the financial statements) on account of credit risk in respect of a contract asset using expected credit loss model on similar basis as applicable to trade receivables.

- Revenue from rendering of services is recognised over time as the customer receives the benefit of the Company's performance and the Company has an enforceable right to payment for services transferred. Unbilled revenue represents value of services performed in accordance with the contract terms but not billed

• Container Freight station services

- Income from cargo handling services is recognised as and when the related services are performed as per the contractual terms agreed with the customers. Revenue from providing services is recognised in the accounting period in which the services are rendered.
- Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of indirect taxes, trade allowances, rebates and amounts collected on behalf of third parties and is not recognised in instances where there is uncertainty with regard to ultimate collection. In such cases revenue is recognised on reasonable certainty of collection.
- Revenue from storage and warehousing is recognised prorata based on the period the container is kept in the Container freight station. However,

in case of long standing containers, the revenue is accounted on the accrual basis to the extent, it is not unreasonable to expect ultimate collection.

- In an agency relationship, the commission income / service fee revenue is recorded on a net basis (net of cost incurred) and cost incurred is netted off with the relevant expenses incurred, since these are incurred on behalf of other parties.

- Multimodal transport operations

- Revenue from Export service is recognised on sailing of vessel and revenue from import services is recognised upon rendering of related services.

- Third Party Logistics income
- Third party logistic service charges and management fees are recognized as and when the service is performed as per contractual terms.
- Income from Transportation service are recognised as and when the services are performed as per Contractual terms.
- Reimbursement of cost is netted off with the relevant expenses incurred since the same are incurred on behalf of the customer.

- Other income

- Interest income on investments and loans is accrued on a time basis by reference to the principal outstanding and the effective interest rate including interest on investments classified as fair value through profit or loss or fair value through other comprehensive income. Interest receivable on customer dues is recognised as income in the Statement of Profit and Loss on accrual basis provided there is no uncertainty of realisation.

- Dividend income is accounted in the period in which the right to receive the same is established.

- Government grants, which are revenue in nature and are towards compensation for the qualifying costs incurred by the Company, are recognised as other income/reduced from underlying expenses in profit or loss in the period in which such costs are incurred. Government grants related to an asset are reduced from the cost of an asset until the asset is ready to use and the grant post that is presented as deferred income. Subsequently the grant is recognised as income in profit or loss on a systematic basis over the expected useful life of the related asset. Government grant receivable in the form of duty credit scrips is recognised as other income in the Statement of Profit and Loss in the period in which the application is made to the government authorities and to the extent there is no uncertainty towards its receipt.

- Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

- Onerous Contract

If the Group has a contract that is onerous, the present obligation under the contract is recognized and measured as a provision. However, before a separate provision for an onerous contract is established, the Group recognizes any impairment loss that has occurred on assets dedicated to that contract. An onerous contract is a contract under which the unavoidable costs (i.e. the costs that the Company cannot avoid because it has the contract) of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it.

- Borrowing costs:

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as a part of the cost of assets during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Borrowing cost consist of interest (calculated using effective rate of interest method) and other cost that an entity incurred in connection with the borrowing cost.

Other borrowing costs are expensed in the period in which they are incurred.

- Provisions, contingent liabilities & contingent assets

General

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

Long-term provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money. Short term provisions are carried at their redemption value and are not offset against receivables from reimbursements.

Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Contingent Assets

A contingent asset is not recognized unless it becomes virtually certain that an inflow of economic benefits will arise. When an inflow of economic benefits is probable, contingent assets are disclosed in the financial statements

- Impairment of Assets:

As at the end of each financial year, the carrying amounts of PPE, investment property, intangible assets and investments in subsidiary are reviewed to determine whether there is any indication that those assets have suffered an impairment loss. If such indication exists, PPE, investment property and intangible assets are tested for impairment so as to determine the impairment loss, if any. Intangible assets with indefinite life are tested for impairment each year. Impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is determined:

- in the case of an individual asset, at the higher of the fair value less costs to sell and the value-in-use; and
- in the case of a cash generating unit (the smallest identifiable group of assets that generates independent cash flows), at the higher of the cash generating unit's fair value less costs to sell and the value-in-use.

The amount of value-in-use is determined as the present value of estimated future cash flows from the continuing use of an asset, which may vary based on the future performance of the Company and from its disposal at the end of its useful life. For this purpose, the discount rate (pre-tax) is determined based on the weighted average cost of capital of the company suitably adjusted for risks specified to the estimated cash flows of the asset. If recoverable amount of an asset (or cash generating unit) is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount. When an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount, such that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

- Foreign currency transactions

Foreign currency transactions are recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

Foreign currency transactions other than export sales are recorded at rates of exchange prevailing on the date of transaction. Export sales are accounted for at monthly average exchange rates. Monetary assets and liabilities denominated in foreign currencies as at the balance sheet date are translated at the rate of exchange prevailing at the year-end. Exchange differences arising on actual payments / realizations and year-end restatements are dealt with in the Statement of Profit and Loss.

Monetary items denominated in foreign currency are revalued at the rates of exchange as on the Balance Sheet date and Exchange differences arising on settlement or translation of monetary items are recognised in statement of profit and loss. Exchange differences on foreign currency borrowings, are accounted for and disclosed under 'finance cost'.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the date of the transaction.

- Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

- Segment reporting

Operating segments are those components of the business whose operating results are regularly reviewed by the chief operating decision making body in the Company to make decisions for performance assessment and resource allocation. The reporting of segment information is the same as provided to the management for the purpose of the performance assessment and resource allocation to the segments. Segment accounting policies are in line with the accounting policies of the Company. In addition, the following specific accounting policies have been followed for segment reporting:

- Segment revenue includes sales and other operational revenue directly identifiable with/allocable to the segment including inter segment revenue.
- Expenses that are directly identifiable with/allocable to segments are considered for determining the segment result.
- Most of the common costs are allocated to segments mainly on the basis of the respective segment revenue estimated at the beginning of the reporting period.
- Income which relates to the Company as a whole and not allocable to segments is included in "unallocable corporate income/(expenditure)(net)".
- Segment result represents profit before interest and tax and includes margins on inter-segment capital jobs, which are reduced in arriving at the profit before tax of the Company.
- Segment result includes the finance costs incurred on interest bearing advances with corresponding credit included in "unallocable corporate income/(expenditure)(net)".
- Segment results have not been adjusted for any exceptional item.
- Segment assets and liabilities include those directly identifiable with the respective segments. Unallocable corporate assets and liabilities represent the assets and liabilities that relate to the Company as a whole.
- Segment non-cash expenses forming part of segment expenses and is allocated to the segment.
- Segment revenue resulting from transactions with other business segments is accounted on the basis of transfer price which are either determined to yield a desired margin or agreed on a negotiated basis.

- Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss [excluding other comprehensive income] for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share are the net profit after tax for the year. The weighted average numbers of equity shares outstanding during the period are adjusted for events of bonus issue and sub-division of shares.

For the purpose of calculating diluted earnings per share, the net profit or loss [excluding other comprehensive income] for the year attributable to equity share holders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

- Convertible preference shares

Convertible preference shares are separated into liability and equity components based on the terms of the contract.

On issuance of the convertible preference shares, the fair value of the liability component is determined using a market rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption.

The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity since conversion option meets Ind AS 32 criteria for fixed to fixed classification. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not remeasured in subsequent years.

Transaction costs are apportioned between the liability and equity components of the convertible preference shares based on the allocation of proceeds to the liability and equity components when the instruments are initially recognised.

- Recent accounting pronouncements and changes in accounting standards

Ministry of Affairs (“MCA”) notified new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On 23rd March 2022, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2022 applicable from April 2022, as below:

Ind AS 103 – Reference to Conceptual Framework The amendments specify that to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Conceptual Framework for Financial Reporting under Indian Accounting Standards (Conceptual Framework) issued by the Institute of Chartered Accountants of India at the acquisition date. These changes do not significantly change the requirements of Ind AS 103. The Group does not expect the amendment to have any significant impact in its financial statements.

Ind AS 16 - Proceeds before intended use the amendments mainly prohibit an entity from deducting from the cost of property, plant and equipment amounts received from selling items produced while the group is preparing the asset for its intended use. Instead, an entity will recognise such sales proceeds and related cost in statement of profit or loss. The Group does not expect the amendments to have any impact in its recognition of its property, plant and equipment in its financial statements.

Ind AS 37- Provisions, Contingent Liabilities and contingent assets the amendment specifies that the cost of fulfilling a contract comprises the costs that relate directly to the contract. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property plant and equipment used in fulfilling the contract). The effective date for adoption of this amendment is annual periods beginning on or after April 1 2022, although early adoption is permitted. The Company has evaluated the amendment and the impact is not expected to be material.

- Use of judgements, estimates and assumptions

In preparing these standalone financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Assumptions and estimation uncertainties

Assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment recognised in the standalone financial statements are as under :

- measurement of useful life, residual values and impairment of property, plant and equipment,
- recognition of deferred tax assets: availability of future taxable profit against which temporary differences shall be deductible,
- measurement of defined benefit obligations and planned assets: key actuarial assumptions, recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources,
- impairment of financial assets and non-financial assets,
- revenue and margin recognition on construction and / or long term service contracts and related provision.

Textual information (8)

Description of accounting policy for determining components of cash and cash equivalents [Text Block]

- Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

Description of accounting policy for determining components of cash and cash equivalents [Text Block]

- Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

Description of accounting policy for measuring inventories [Text Block]

• Inventories

Inventories are valued after providing for obsolescence, as under:

- Raw materials, components, construction materials, stores, spares and loose tools at lower of weighted average cost or net realisable value. However, these items are considered to be realisable at cost if the finished products in which they will be used, are expected to be sold at or above cost. Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition
- Finished goods and stock-in-trade (in respect of goods acquired for trading) at lower of weighted average cost or net realisable value. Cost includes costs of purchases, costs of conversion and other costs incurred in bringing the inventories to their present location. Taxes which are subsequently recoverable from taxation authorities are not included in the cost.

Assessment of net realisable value is made at each reporting period end and when the circumstances that previously caused inventories to be written-down below cost no longer exist or when there is clear evidence of an increase in net realisable value because of changed economic circumstances, the write-down, if any, in the past period is reversed to the extent of the original amount written-down so that the resultant carrying amount is the lower of the cost and the revised net realisable value.

Description of accounting policy for recognition of revenue [Text Block]

- Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

The Company transfers control of a good or service over time and therefore satisfies a performance obligation and recognises revenue over a period of time if one of the following criteria is met:

- the customer simultaneously consumes the benefit of the Company's performance or
- the customer controls the asset as it is being created/enhanced by the Company's performance or
- there is no alternative use of the asset and the Company has either explicit or implicit right of payment considering legal precedents,

In all other cases, performance obligation is considered as satisfied at a point in time.

The revenue is recognised to the extent of transaction price allocated to the performance obligation satisfied. Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer excluding amounts collected on behalf of a third party. The Company includes variable consideration as part of transaction price when there is a basis to reasonably estimate the amount of the variable consideration and when it is probable that a significant reversal of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is resolved. Variable consideration is estimated using the expected value method or most likely amount as appropriate in a given circumstance. Payment terms agreed with a customer are as per business practice and the financing component, if significant, is separated from the transaction price and accounted as interest income. Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in profit or loss immediately in the period in which such costs are incurred. Incremental costs of obtaining a contract, if any, and costs incurred to fulfil a contract are amortised over the period of execution of the contract in proportion to the progress measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Significant judgments are used in:

- Determining the revenue to be recognised in case of performance obligation satisfied over a period of time; revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation.
- Determining the expected losses, which are recognised in the period in which such losses become probable based on the expected total contract cost as at the reporting date.
- Determining the method to be applied to arrive at the variable consideration requiring an adjustment to the transaction price

- Revenue from operations

Revenue includes adjustments made towards liquidated damages and variation wherever applicable. Escalation and other claims, which are not ascertainable/acknowledged by customers are not taken into account.

- Revenue from sale of manufactured and traded goods including contracts for supply/commissioning of complex plant and equipment is recognised as follows:

Revenue is recognised when the control of the same is transferred to the customer and it is probable that the Company will collect the consideration to which it is entitled for the exchanged goods. Revenue from commissioning of complex plant and equipment is recognised either 'over time' or 'in time' based on an assessment of the transfer of control as per the terms of the contract.

- Revenue from construction/project related activity is recognised as follows:

- **Cost plus contracts:** Revenue from cost plus contracts is recognised over time and is determined with reference to the extent performance obligations have been satisfied. The amount of transaction price allocated to the performance obligations satisfied represents the recoverable costs incurred during the period plus the margin as agreed with the customer.

- **Fixed price contracts:** Contract revenue is recognised over time to the extent of performance obligation satisfied and control is transferred to the customer. Contract revenue is recognised at allocable transaction price which represents the cost of work performed on the contract plus proportionate margin, using the percentage of completion method. Percentage of completion is the proportion of cost of work performed to-date, to the total estimated contract costs.

For contracts where the aggregate of contract cost incurred to date plus recognised profits (or minus recognised losses as the case may be) exceeds the progress billing, the surplus is shown as contract asset and termed as “Due from customers”. For contracts where progress billing exceeds the aggregate of contract costs incurred to-date plus recognised profits (or minus recognised losses, as the case may be), the surplus is shown as contract liability and termed as “Due to customers”. Amounts received before the related work is performed are disclosed in the Balance Sheet as contract liability and termed as “Advances from customer”. The amounts billed on customer for work performed and are unconditionally due for payment i.e. only passage of time is required before payment falls due, are disclosed in the Balance Sheet as trade receivables. The amount of retention money held by the customers pending completion of performance milestone is disclosed as part of contract asset and is reclassified as trade receivables when it becomes due for payment. Impairment loss (termed as provision for foreseeable losses in the financial statements) is recognised in profit or loss to the extent the carrying amount of the contract asset exceeds the remaining amount of consideration that the Company expects to receive towards remaining performance obligations (after deducting the costs that relate directly to fulfill such remaining performance obligations). The Company recognises impairment loss (termed as provision for expected credit loss on contract assets in the financial statements) on account of credit risk in respect of a contract asset using expected credit loss model on similar basis as applicable to trade receivables.

- Revenue from rendering of services is recognised over time as the customer receives the benefit of the Company’s performance and the Company has an enforceable right to payment for services transferred. Unbilled revenue represents value of services performed in accordance with the contract terms but not billed

- **Container Freight station services**

- Income from cargo handling services is recognised as and when the related services are performed as per the contractual terms agreed with the customers. Revenue from providing services is recognised in the accounting period in which the services are rendered.

- Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of indirect taxes, trade allowances, rebates and amounts collected on behalf of third parties and is not recognised in instances where there is uncertainty with regard to ultimate collection. In such cases revenue is recognised on reasonable certainty of collection.

- Revenue from storage and warehousing is recognised prorata based on the period the container is kept in the Container freight station. However, in case of long standing containers, the revenue is accounted on the accrual basis to the extent, it is not unreasonable to expect ultimate collection.

- In an agency relationship, the commission income / service fee revenue is recorded on a net basis (net of cost incurred) and cost incurred is netted off with the relevant expenses incurred, since these are incurred on behalf of other parties.

- **Multimodal transport operations**

- Revenue from Export service is recognised on sailing of vessel and revenue from import services is recognised upon rendering of related services.

- **Third Party Logistics income**

- Third party logistic service charges and management fees are recognized as and when the service is performed as per contractual terms.

- Income from Transportation service are recognised as and when the services are performed as per Contractual terms.

- Reimbursement of cost is netted off with the relevant expenses incurred since the same are incurred on behalf of the customer.

- **Other income**

- Interest income on investments and loans is accrued on a time basis by reference to the principal outstanding and the effective interest rate including interest on investments classified as fair value through profit or loss or fair value through other comprehensive income. Interest receivable on customer dues is recognised as income in the Statement of Profit and Loss on accrual basis provided there is no uncertainty of realisation.

- Dividend income is accounted in the period in which the right to receive the same is established.

- Government grants, which are revenue in nature and are towards compensation for the qualifying costs incurred by the Company, are recognised as other income/reduced from underlying expenses in profit or loss in the period in which such costs are incurred. Government grants related to an

asset are reduced from the cost of an asset until the asset is ready to use and the grant post that is presented as deferred income. Subsequently the grant is recognised as income in profit or loss on a systematic basis over the expected useful life of the related asset. Government grant receivable in the form of duty credit scrips is recognised as other income in the Statement of Profit and Loss in the period in which the application is made to the government authorities and to the extent there is no uncertainty towards its receipt.

Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably

Statement of Ind AS compliance [Text Block]

• Basis of preparation:

The Consolidated financial statements have been prepared in accordance with Indian Accounting Standards [Ind AS] notified under the Companies [Indian Accounting Standards] Rules, 2015, as amended from time to time and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III).

For all periods up to and including the year ended 31st March 2022, the Company has prepared its financial statements in accordance with the accounting standards notified under the section 133 of the Companies Act, 2013, read with relevant rules as amended [Indian GAAP].

The Group has adopted Ind AS as per Companies [Indian Accounting Standards] [Ind AS] Rules, 2015 as notified under section 133 of the Companies Act, 2013 for these financial statements beginning from 1st April 2020. As per the principles of Ind AS 101 “First time adoption of Indian Accounting Standard”, the transition date to Ind AS is 1st April 2020 and hence the comparatives for the previous year ended 31st March, 2022 and balances as on 1st April, 2020 have been restated as per the principles of Ind AS, wherever deemed necessary.

Disclosure of significant accounting policies [Text Block]

• Corporate Information

Apollo Green Energy Limited ('the Holding Company' or 'the Company') together with its subsidiaries (collectively referred to as the 'Group'), joint ventures, was incorporated dated August 25, 1994 under the provisions of the Companies Act, 2013 having CIN No. U74899DL1994PLC061080.

The Group's main business is to:

- export of diverse range of products and equipment in the field of steel, cement, water treatment plants and other infrastructure projects through its Engineering & Projects Division, manufacturing and export of leather garments and accessories through its Tag Fashion Division and export and domestic sale of tyres, tubes and flaps through its Tyre Tech Global Division.
- undertake and carry on the business of storage, handling, loading, unloading, warehousing, transporting, and repairing of marine containers, developing and operating a container freight station and entering into contracts and arrangements of all kinds with shippers, ship-owners, container owners, container lessees and lessors, shipping agents and transporters.
- render end to end logistics services comprising of activities related to consolidation of cargo, transportation, freight forwarding and customs clearance services to its customers.

These financial statements of the Company for the year ended March 31st, 2024, were approved and adopted by board of directors of the Company in their meeting held on November 28, 2024.

• Significant accounting policies

• Basis of preparation:

The Consolidated financial statements have been prepared in accordance with Indian Accounting Standards [Ind AS] notified under the Companies [Indian Accounting Standards] Rules, 2015, as amended from time to time and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III).

For all periods up to and including the year ended 31st March 2022, the Company has prepared its financial statements in accordance with the accounting standards notified under the section 133 of the Companies Act, 2013, read with relevant rules as amended [Indian GAAP].

The Group has adopted Ind AS as per Companies [Indian Accounting Standards] [Ind AS] Rules, 2015 as notified under section 133 of the Companies Act, 2013 for these financial statements beginning from 1st April 2020. As per the principles of Ind AS 101 "First time adoption of Indian Accounting Standard", the transition date to Ind AS is 1st April 2020 and hence the comparatives for the previous year ended 31st March, 2022 and balances as on 1st April, 2020 have been restated as per the principles of Ind AS, wherever deemed necessary.

• Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company its Subsidiaries, Associates and Joint Venture as at 31 March 2024. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has: -

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee),
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights
- The size of the group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member's financial statements in preparing the consolidated financial statements to ensure conformity with the Group's accounting policies.

Consolidation procedure:

- The financial statements of the Holding Company and its subsidiaries are combined on a line-by-line basis by adding together like items of assets, liabilities, equity, incomes, expense and cash flows, after fully eliminating intra-group balances and intragroup transactions
- Combine like items of assets, liabilities, equity, income, expense, and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the consolidated financial statements at the acquisition date.
- Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary.
- Eliminate in full intragroup assets and liabilities, equity, income, expense, and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the consolidated financial statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.
- In case of foreign subsidiaries, revenue items are consolidated at the average rate prevailing during the year. All Monetary items and non-monetary items form part of assets and liabilities are converted at rates prevailing at the end of the year and actual rate respectively. Any exchange difference arising on consolidation is recognised in the Foreign Currency Translation Reserve (FCTR).
- The audited / unaudited financial statements of foreign subsidiaries / joint ventures / associates have been prepared in accordance with the Generally Accepted Accounting Principle of its Country of incorporation or Ind AS.
- Investment in Associates and Joint Ventures has been accounted under the Equity Method as per Ind AS 28 – Investments in Associates and Joint Ventures. Investments in joint operations are accounted using the Proportionate Consolidation Method as per Ind AS 111 – Joint Arrangements.
- The difference between the proceeds from disposal of investment in subsidiaries and the carrying amount of its assets less liabilities as on the date of disposal is recognised in the Consolidated Statement of Profit and Loss being the profit or loss on disposal of investment in subsidiary.

• The Group accounts for its share of post-acquisition changes in net assets of associates and joint ventures, after eliminating unrealised profits and losses resulting from transactions between the Group and its associates and joint ventures.

• Non-Controlling Interest's share of profit / loss of consolidated subsidiaries for the year is identified and adjusted against the income of the Group in order to arrive at the net income attributable to shareholders of the Company.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

- A change in the ownership interest of a subsidiary, without a loss of control, is accounted as an equity transaction. If the Group loses control over a subsidiary, it:
 - Derecognises the assets (including goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost
 - Derecognises the carrying amount of any non-controlling interests
 - Derecognises the cumulative translation differences recorded in equity
 - Recognises the fair value of the consideration received
 - Recognises the fair value of any investment retained
 - Recognises any surplus or deficit in profit or loss
 - Recognise that distribution of shares of subsidiary to Group in Group's capacity as owners
 - Reclassifies the parent's share of components previously recognised in OCI to profit or loss or transferred directly to retained earnings, if required by other Ind ASs as would be required if the Group had directly disposed of the related assets or liabilities

• Foreign Currency Transactions

Functional & presentational currency

The Consolidated financial statements of the foreign subsidiaries, which are consolidated into the consolidated financial statements of the Group, are prepared and the items included in the consolidated financial statements are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are prepared in the Indian Rupees which is the Group's presentation currency.

The Group has deemed the cumulative translation differences for foreign operations at the date of transition to be zero. Adjustments to give effect to this are recorded against opening equity. After the date of transition, translation differences arising on translation of foreign operations are recognised in other comprehensive income and included in a separate translation reserve within equity.

Transactions and balances

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the transaction. Gains/Losses arising out of fluctuation in foreign exchange rate between the transaction date and settlement date are recognised in the Statement of Profit and Loss.

All monetary assets and liabilities in foreign currencies are restated at the year end at the exchange rate prevailing at the year end and the exchange differences are recognised in the Statement of Profit and Loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

Conversion

Functional and reporting currencies of foreign operations are different from the reporting currency of the Holding Group. For all the foreign operations of the Group, all assets and liabilities (excluding share capital and opening reserves and surplus) are translated into INR using the exchange rate prevailing at the reporting date. Share capital, reserves and surplus are carried at historical cost. Revenues, costs and expenses are translated using the weighted average exchange rate during the reporting period. The resultant currency translation difference is recognised as foreign currency translation reserve under the head 'Other Equity'. On the disposal of a foreign operation, all of the accumulated exchange differences in respect of that operation attributable to the Group are reclassified to the consolidated statement of profit and loss.

- Current vs non-current classifications:

An operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle. The projects business comprises long-term contracts which have an operating cycle exceeding one year. For classification of current assets and liabilities related to projects business, the Group uses the duration of the contract as its operating cycle.

The Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it satisfies below criteria:

- Expected to be realised or intended to be sold or consumed in a normal operating cycle;
- Held for primary purpose of trading.
- Expected to be realised within twelve months after reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current assets.

A Liability is classified as current when it satisfies below criteria:

- Expected to settle the liability in normal operating cycle;
- Help primarily for the purpose of trading;
- Due to be settled within twelve months after reporting period; or
- There is no unconditional right to defer the settlement of liability for at least twelve months after reporting period.

All other liabilities are classified as non-current liabilities.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

- Property, plant and equipment (PPE)

Property, Plant and Equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Cost comprises the purchase price, including import duties and non-refundable purchase taxes, and any directly attributable cost of bringing the asset to its working condition for its intended use. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to Statement of Profit and Loss during the year in which they are incurred.

Gains or losses arising from de-recognition of a property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognized.

PPE not ready for the intended use on the date of the Balance Sheet are disclosed as "capital work-in-progress".

- Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

- Depreciation/amortization

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value which is taken as nil.

Depreciation is provided on the Straight Line Method as per the rates derived from the balance useful lives of relevant classes of assets prescribed in Schedule II of Companies Act, 2013. Depreciation has been provided on pro-rata basis from the date the assets are put to use during the financial year. In respect of asset sold or disposed off during the year, depreciation is provided till the date of sale/disposal/adjustments of the assets.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The estimated useful lives of assets and residual values are reviewed regularly and, when necessary, and adjusted prospectively, if appropriate

Leasehold improvements are amortized over the lease period, which corresponds with the useful lives of the assets.

The company amortized intangible assets over their estimated useful lives using the straight-line method (SLM).

- Lease

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Group as a lessor

Lease income from operating leases where the Group is a lessor is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

- Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis from the commencement date over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (O) Impairment of non-financial assets.

- Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liabilities and Right-of-use assets have been presented as a separate line in the balance sheet. Lease payments have been classified as cash used in financing activities.

- Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases of all assets that have a lease term of 12 months or less and leases of low-value assets. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease.

- Investment Property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

Investment properties are subsequently measured at cost less depreciation. Investment properties are depreciated using the straight-line method over their estimated useful lives.

- Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

- Financial asset

- Initial recognition and measurement

All financial assets are initially recognized at fair value. Transaction costs will be considered as part of the cost of acquisition that are directly attributable to the acquisition or issue of financial assets, which are measured through Fair Value Through Profit and Loss (FVTPL). Purchase and sale of financial assets are recognised using trade date accounting.

Fair value Measurement

The Group measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer liability takes place either:

? In the principal market for the asset or liability, or

? In the absence of a principal market, in the most advantageous market for the asset or liability accessible to the Company.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group business model for managing them. All financial assets are recognised initially at fair value plus transaction costs that are attributable to the acquisition of the financial assets in the case of financial assets not recorded at fair value through profit or loss, however transaction costs directly attributable to the acquisition of financial assets at fair value through profit and loss are immediately recognised in the statement of profit and loss. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

- Subsequent measurement

- Financial assets measured at amortised cost

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the

Contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- Financial assets measured at Fair Value Through Other Comprehensive Income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For Equity investments the Group has elected to recognize changes in the fair value of certain investments in equity securities in other comprehensive income. These changes are accumulated within the FVOCI equity investments reserve within equity.

- Financial Assets measured at Fair Value Through Profit or Loss (FVTPL)

A financial asset which is not classified in any of the above categories is measured at FVTPL.

Investment in equity instruments issued by subsidiary, associate and joint venture companies are measured at cost less impairment.

- Loans to employees and other entities

Loans given to employees and other entities are repayable to the company on demand and hence are carried at cost in the financial statements.

- Impairment of financial assets

The Company recognizes loss allowance using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all financial assets with contractual cash flows other than trade receivable, ECLs are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of ECLs (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised as an impairment gain or loss in the Statement of Profit and Loss.

- Financial liabilities

- Financial liabilities: initial recognition and measurement

All financial liabilities are recognized at fair value and in case of borrowings, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

- Financial liabilities: subsequent measurement

Financial liabilities are carried at amortized cost using the Effective interest rate (EIR) method.

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

c) Loans and borrowings

This is the category most relevant to the Group. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in statement of profit and loss when the liabilities are derecognised as well as through the EIR amortization process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

- De-recognition of financial instruments

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the

Company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

- Offsetting

Financial assets and financial liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Group has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

- Employee benefits:

- Short term employee benefits

Employee benefits such as salaries, wages, short-term compensated absences, bonus, ex-gratia and performance-linked rewards falling due wholly within twelve months of rendering the service are classified as short-term employee benefits and are expensed in the period in which the employee renders the service.

- Post-employment benefits

- Defined contribution plan:

- Provident fund

The Group superannuation scheme, state governed provident fund scheme, employee state insurance scheme and employee pension scheme are defined contribution plans. The contribution paid/payable under the schemes is recognised during the period in which the employee renders the service. The Group has no obligation, other than the contribution payable to the provident fund. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

- Defined benefits plan:

The Group provides for gratuity, a defined benefit plan (the 'Gratuity Plan') covering eligible employees in accordance with the Payment of Gratuity Act, 1972. Gratuity liability is a defined benefit obligation and is provided on the basis of its actuarial valuation based on the projected unit credit method made at each Balance Sheet date. The Company funds gratuity benefits for its employees within the limits prescribed under The Payment of Gratuity (Amendment) Act, 2018 through contributions to a Scheme administered by the Life Insurance Corporation of India ('LIC').

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

- Other long-term employee benefit obligations

Compensated absences: The employees can carry-forward a portion of the unutilised accrued compensated absences and utilise it in future service periods or receive cash compensation on termination of employment. Since, the compensated absences do not fall due wholly within twelve months after the end of the period in which the employees render the related service and are also not expected to be utilised wholly within twelve months after the end of such period, the benefit is classified as a long-term employee benefit. The Group records an obligation for such compensated absences in the period in which the employee renders the services that increase their entitlement. The obligation is measured on the basis of independent actuarial valuation using the projected unit credit method on the Balance Sheet date.

- Income taxes

Tax expenses comprise of current and deferred tax.

- Current Tax:

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

- Deferred Tax:

Deferred tax is recognised on temporary difference between the carrying amount of assets and liabilities in the Financial Statements and the corresponding tax based used in computation of taxable profit.

Deferred tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilized.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

- Inventories

Inventories are valued after providing for obsolescence, as under:

- Raw materials, components, construction materials, stores, spares and loose tools at lower of weighted average cost or net realisable value. However, these items are considered to be realisable at cost if the finished products in which they will be used, are expected to be sold at or above cost. Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition
- Finished goods and stock-in-trade (in respect of goods acquired for trading) at lower of weighted average cost or net realisable value. Cost includes costs of purchases, costs of conversion and other costs incurred in bringing the inventories to their present location. Taxes which are subsequently recoverable from taxation authorities are not included in the cost.

Assessment of net realisable value is made at each reporting period end and when the circumstances that previously caused inventories to be written-down below cost no longer exist or when there is clear evidence of an increase in net realisable value because of changed economic circumstances, the write-down, if any, in the past period is reversed to the extent of the original amount written-down so that the resultant carrying amount is the lower of the cost and the revised net realisable value.

- Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

The Company transfers control of a good or service over time and therefore satisfies a performance obligation and recognises revenue over a period of time if one of the following criteria is met:

- the customer simultaneously consumes the benefit of the Company's performance or
- the customer controls the asset as it is being created/enhanced by the Company's performance or
- there is no alternative use of the asset and the Company has either explicit or implicit right of payment considering legal precedents,

In all other cases, performance obligation is considered as satisfied at a point in time.

The revenue is recognised to the extent of transaction price allocated to the performance obligation satisfied. Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer excluding amounts collected on behalf of a third party. The Company includes variable consideration as part of transaction price when there is a basis to reasonably estimate the amount of the variable consideration and when it is probable that a significant reversal of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is resolved. Variable consideration is estimated using the expected value

method or most likely amount as appropriate in a given circumstance. Payment terms agreed with a customer are as per business practice and the financing component, if significant, is separated from the transaction price and accounted as interest income. Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in profit or loss immediately in the period in which such costs are incurred. Incremental costs of obtaining a contract, if any, and costs incurred to fulfil a contract are amortised over the period of execution of the contract in proportion to the progress measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Significant judgments are used in:

- Determining the revenue to be recognised in case of performance obligation satisfied over a period of time; revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation.
- Determining the expected losses, which are recognised in the period in which such losses become probable based on the expected total contract cost as at the reporting date.
- Determining the method to be applied to arrive at the variable consideration requiring an adjustment to the transaction price

• Revenue from operations

Revenue includes adjustments made towards liquidated damages and variation wherever applicable. Escalation and other claims, which are not ascertainable/acknowledged by customers are not taken into account.

- Revenue from sale of manufactured and traded goods including contracts for supply/commissioning of complex plant and equipment is recognised as follows:

Revenue is recognised when the control of the same is transferred to the customer and it is probable that the Company will collect the consideration to which it is entitled for the exchanged goods. Revenue from commissioning of complex plant and equipment is recognised either 'over time' or 'in time' based on an assessment of the transfer of control as per the terms of the contract.

• Revenue from construction/project related activity is recognised as follows:

- Cost plus contracts: Revenue from cost plus contracts is recognised over time and is determined with reference to the extent performance obligations have been satisfied. The amount of transaction price allocated to the performance obligations satisfied represents the recoverable costs incurred during the period plus the margin as agreed with the customer.
- Fixed price contracts: Contract revenue is recognised over time to the extent of performance obligation satisfied and control is transferred to the customer. Contract revenue is recognised at allocable transaction price which represents the cost of work performed on the contract plus proportionate margin, using the percentage of completion method. Percentage of completion is the proportion of cost of work performed to-date, to the total estimated contract costs.

For contracts where the aggregate of contract cost incurred to date plus recognised profits (or minus recognised losses as the case may be) exceeds the progress billing, the surplus is shown as contract asset and termed as "Due from customers". For contracts where progress billing exceeds the aggregate of contract costs incurred to-date plus recognised profits (or minus recognised losses, as the case may be), the surplus is shown as contract liability and termed as "Due to customers". Amounts received before the related work is performed are disclosed in the Balance Sheet as contract liability and termed as "Advances from customer". The amounts billed on customer for work performed and are unconditionally due for payment i.e. only passage of time is required before payment falls due, are disclosed in the Balance Sheet as trade receivables. The amount of retention money held by the customers pending completion of performance milestone is disclosed as part of contract asset and is reclassified as trade receivables when it becomes due for payment. Impairment loss (termed as provision for foreseeable losses in the financial statements) is recognised in profit or loss to the extent the carrying amount of the contract asset exceeds the remaining amount of consideration that the Company expects to receive towards remaining performance obligations (after deducting the costs that relate directly to fulfill such remaining performance obligations). The Company recognises impairment loss (termed as provision for expected credit loss on contract assets in the financial statements) on account of credit risk in respect of a contract asset using expected credit loss model on similar basis as applicable to trade receivables.

- Revenue from rendering of services is recognised over time as the customer receives the benefit of the Company's performance and the Company has an enforceable right to payment for services transferred. Unbilled revenue represents value of services performed in accordance with the contract terms but not billed

• Container Freight station services

- Income from cargo handling services is recognised as and when the related services are performed as per the contractual terms agreed with the customers. Revenue from providing services is recognised in the accounting period in which the services are rendered.
- Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of indirect taxes, trade allowances, rebates and amounts collected on behalf of third parties and is not recognised in instances where there is uncertainty with regard to ultimate collection. In such cases revenue is recognised on reasonable certainty of collection.
- Revenue from storage and warehousing is recognised prorata based on the period the container is kept in the Container freight station. However,

in case of long standing containers, the revenue is accounted on the accrual basis to the extent, it is not unreasonable to expect ultimate collection.

- In an agency relationship, the commission income / service fee revenue is recorded on a net basis (net of cost incurred) and cost incurred is netted off with the relevant expenses incurred, since these are incurred on behalf of other parties.

- Multimodal transport operations

- Revenue from Export service is recognised on sailing of vessel and revenue from import services is recognised upon rendering of related services.

- Third Party Logistics income
- Third party logistic service charges and management fees are recognized as and when the service is performed as per contractual terms.
- Income from Transportation service are recognised as and when the services are performed as per Contractual terms.
- Reimbursement of cost is netted off with the relevant expenses incurred since the same are incurred on behalf of the customer.

- Other income

- Interest income on investments and loans is accrued on a time basis by reference to the principal outstanding and the effective interest rate including interest on investments classified as fair value through profit or loss or fair value through other comprehensive income. Interest receivable on customer dues is recognised as income in the Statement of Profit and Loss on accrual basis provided there is no uncertainty of realisation.

- Dividend income is accounted in the period in which the right to receive the same is established.

- Government grants, which are revenue in nature and are towards compensation for the qualifying costs incurred by the Company, are recognised as other income/reduced from underlying expenses in profit or loss in the period in which such costs are incurred. Government grants related to an asset are reduced from the cost of an asset until the asset is ready to use and the grant post that is presented as deferred income. Subsequently the grant is recognised as income in profit or loss on a systematic basis over the expected useful life of the related asset. Government grant receivable in the form of duty credit scrips is recognised as other income in the Statement of Profit and Loss in the period in which the application is made to the government authorities and to the extent there is no uncertainty towards its receipt.

- Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

- Onerous Contract

If the Group has a contract that is onerous, the present obligation under the contract is recognized and measured as a provision. However, before a separate provision for an onerous contract is established, the Group recognizes any impairment loss that has occurred on assets dedicated to that contract. An onerous contract is a contract under which the unavoidable costs (i.e. the costs that the Company cannot avoid because it has the contract) of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it.

- Borrowing costs:

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as a part of the cost of assets during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Borrowing cost consist of interest (calculated using effective rate of interest method) and other cost that an entity incurred in connection with the borrowing cost.

Other borrowing costs are expensed in the period in which they are incurred.

- Provisions, contingent liabilities & contingent assets

General

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

Long-term provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money. Short term provisions are carried at their redemption value and are not offset against receivables from reimbursements.

Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Contingent Assets

A contingent asset is not recognized unless it becomes virtually certain that an inflow of economic benefits will arise. When an inflow of economic benefits is probable, contingent assets are disclosed in the financial statements

- Impairment of Assets:

As at the end of each financial year, the carrying amounts of PPE, investment property, intangible assets and investments in subsidiary are reviewed to determine whether there is any indication that those assets have suffered an impairment loss. If such indication exists, PPE, investment property and intangible assets are tested for impairment so as to determine the impairment loss, if any. Intangible assets with indefinite life are tested for impairment each year. Impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is determined:

- in the case of an individual asset, at the higher of the fair value less costs to sell and the value-in-use; and
- in the case of a cash generating unit (the smallest identifiable group of assets that generates independent cash flows), at the higher of the cash generating unit's fair value less costs to sell and the value-in-use.

The amount of value-in-use is determined as the present value of estimated future cash flows from the continuing use of an asset, which may vary based on the future performance of the Company and from its disposal at the end of its useful life. For this purpose, the discount rate (pre-tax) is determined based on the weighted average cost of capital of the company suitably adjusted for risks specified to the estimated cash flows of the asset. If recoverable amount of an asset (or cash generating unit) is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount. When an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount, such that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

- Foreign currency transactions

Foreign currency transactions are recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

Foreign currency transactions other than export sales are recorded at rates of exchange prevailing on the date of transaction. Export sales are accounted for at monthly average exchange rates. Monetary assets and liabilities denominated in foreign currencies as at the balance sheet date are translated at the rate of exchange prevailing at the year-end. Exchange differences arising on actual payments / realizations and year-end restatements are dealt with in the Statement of Profit and Loss.

Monetary items denominated in foreign currency are revalued at the rates of exchange as on the Balance Sheet date and Exchange differences arising on settlement or translation of monetary items are recognised in statement of profit and loss. Exchange differences on foreign currency borrowings, are accounted for and disclosed under 'finance cost'.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the date of the transaction.

- Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

- Segment reporting

Operating segments are those components of the business whose operating results are regularly reviewed by the chief operating decision making body in the Company to make decisions for performance assessment and resource allocation. The reporting of segment information is the same as provided to the management for the purpose of the performance assessment and resource allocation to the segments. Segment accounting policies are in line with the accounting policies of the Company. In addition, the following specific accounting policies have been followed for segment reporting:

- Segment revenue includes sales and other operational revenue directly identifiable with/allocable to the segment including inter segment revenue.
- Expenses that are directly identifiable with/allocable to segments are considered for determining the segment result.
- Most of the common costs are allocated to segments mainly on the basis of the respective segment revenue estimated at the beginning of the reporting period.
- Income which relates to the Company as a whole and not allocable to segments is included in "unallocable corporate income/(expenditure)(net)".
- Segment result represents profit before interest and tax and includes margins on inter-segment capital jobs, which are reduced in arriving at the profit before tax of the Company.
- Segment result includes the finance costs incurred on interest bearing advances with corresponding credit included in "unallocable corporate income/(expenditure)(net)".
- Segment results have not been adjusted for any exceptional item.
- Segment assets and liabilities include those directly identifiable with the respective segments. Unallocable corporate assets and liabilities represent the assets and liabilities that relate to the Company as a whole.
- Segment non-cash expenses forming part of segment expenses and is allocated to the segment.
- Segment revenue resulting from transactions with other business segments is accounted on the basis of transfer price which are either determined to yield a desired margin or agreed on a negotiated basis.

- Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss [excluding other comprehensive income] for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share are the net profit after tax for the year. The weighted average numbers of equity shares outstanding during the period are adjusted for events of bonus issue and sub-division of shares.

For the purpose of calculating diluted earnings per share, the net profit or loss [excluding other comprehensive income] for the year attributable to equity share holders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

- Convertible preference shares

Convertible preference shares are separated into liability and equity components based on the terms of the contract.

On issuance of the convertible preference shares, the fair value of the liability component is determined using a market rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption.

The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity since conversion option meets Ind AS 32 criteria for fixed to fixed classification. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not remeasured in subsequent years.

Transaction costs are apportioned between the liability and equity components of the convertible preference shares based on the allocation of proceeds to the liability and equity components when the instruments are initially recognised.

- Recent accounting pronouncements and changes in accounting standards

Ministry of Affairs (“MCA”) notified new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On 23rd March 2022, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2022 applicable from April 2022, as below:

Ind AS 103 – Reference to Conceptual Framework The amendments specify that to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Conceptual Framework for Financial Reporting under Indian Accounting Standards (Conceptual Framework) issued by the Institute of Chartered Accountants of India at the acquisition date. These changes do not significantly change the requirements of Ind AS 103. The Group does not expect the amendment to have any significant impact in its financial statements.

Ind AS 16 - Proceeds before intended use the amendments mainly prohibit an entity from deducting from the cost of property, plant and equipment amounts received from selling items produced while the group is preparing the asset for its intended use. Instead, an entity will recognise such sales proceeds and related cost in statement of profit or loss. The Group does not expect the amendments to have any impact in its recognition of its property, plant and equipment in its financial statements.

Ind AS 37- Provisions, Contingent Liabilities and contingent assets the amendment specifies that the cost of fulfilling a contract comprises the costs that relate directly to the contract. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property plant and equipment used in fulfilling the contract). The effective date for adoption of this amendment is annual periods beginning on or after April 1 2022, although early adoption is permitted. The Company has evaluated the amendment and the impact is not expected to be material.

- Use of judgements, estimates and assumptions

In preparing these standalone financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Assumptions and estimation uncertainties

Assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment recognised in the standalone financial statements are as under :

- measurement of useful life, residual values and impairment of property, plant and equipment,
- recognition of deferred tax assets: availability of future taxable profit against which temporary differences shall be deductible,
- measurement of defined benefit obligations and planned assets: key actuarial assumptions, recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources,
- impairment of financial assets and non-financial assets,
- revenue and margin recognition on construction and / or long term service contracts and related provision.

Disclosure of significant accounting policies [Text Block]

• Corporate Information

Apollo Green Energy Limited ('the Holding Company' or 'the Company') together with its subsidiaries (collectively referred to as the 'Group'), joint ventures, was incorporated dated August 25, 1994 under the provisions of the Companies Act, 2013 having CIN No. U74899DL1994PLC061080.

The Group's main business is to:

- export of diverse range of products and equipment in the field of steel, cement, water treatment plants and other infrastructure projects through its Engineering & Projects Division, manufacturing and export of leather garments and accessories through its Tag Fashion Division and export and domestic sale of tyres, tubes and flaps through its Tyre Tech Global Division.
- undertake and carry on the business of storage, handling, loading, unloading, warehousing, transporting, and repairing of marine containers, developing and operating a container freight station and entering into contracts and arrangements of all kinds with shippers, ship-owners, container owners, container lessees and lessors, shipping agents and transporters.
- render end to end logistics services comprising of activities related to consolidation of cargo, transportation, freight forwarding and customs clearance services to its customers.

These financial statements of the Company for the year ended March 31st, 2024, were approved and adopted by board of directors of the Company in their meeting held on November 28, 2024.

• Significant accounting policies

• Basis of preparation:

The Consolidated financial statements have been prepared in accordance with Indian Accounting Standards [Ind AS] notified under the Companies [Indian Accounting Standards] Rules, 2015, as amended from time to time and presentation requirements of Division II of Schedule III to the Companies Act, 2013, (Ind AS compliant Schedule III).

For all periods up to and including the year ended 31st March 2022, the Company has prepared its financial statements in accordance with the accounting standards notified under the section 133 of the Companies Act, 2013, read with relevant rules as amended [Indian GAAP].

The Group has adopted Ind AS as per Companies [Indian Accounting Standards] [Ind AS] Rules, 2015 as notified under section 133 of the Companies Act, 2013 for these financial statements beginning from 1st April 2020. As per the principles of Ind AS 101 "First time adoption of Indian Accounting Standard", the transition date to Ind AS is 1st April 2020 and hence the comparatives for the previous year ended 31st March, 2022 and balances as on 1st April, 2020 have been restated as per the principles of Ind AS, wherever deemed necessary.

• Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company its Subsidiaries, Associates and Joint Venture as at 31 March 2024. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has: -

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee),
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights
- The size of the group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to that Group member's financial statements in preparing the consolidated financial statements to ensure conformity with the Group's accounting policies.

Consolidation procedure:

- The financial statements of the Holding Company and its subsidiaries are combined on a line-by-line basis by adding together like items of assets, liabilities, equity, incomes, expense and cash flows, after fully eliminating intra-group balances and intragroup transactions
- Combine like items of assets, liabilities, equity, income, expense, and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the consolidated financial statements at the acquisition date.
- Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary.
- Eliminate in full intragroup assets and liabilities, equity, income, expense, and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Intragroup losses may indicate an impairment that requires recognition in the consolidated financial statements. Ind AS 12 Income Taxes applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.
- In case of foreign subsidiaries, revenue items are consolidated at the average rate prevailing during the year. All Monetary items and non-monetary items form part of assets and liabilities are converted at rates prevailing at the end of the year and actual rate respectively. Any exchange difference arising on consolidation is recognised in the Foreign Currency Translation Reserve (FCTR).
- The audited / unaudited financial statements of foreign subsidiaries / joint ventures / associates have been prepared in accordance with the Generally Accepted Accounting Principle of its Country of incorporation or Ind AS.
- Investment in Associates and Joint Ventures has been accounted under the Equity Method as per Ind AS 28 – Investments in Associates and Joint Ventures. Investments in joint operations are accounted using the Proportionate Consolidation Method as per Ind AS 111 – Joint Arrangements.
- The difference between the proceeds from disposal of investment in subsidiaries and the carrying amount of its assets less liabilities as on the date of disposal is recognised in the Consolidated Statement of Profit and Loss being the profit or loss on disposal of investment in subsidiary.

• The Group accounts for its share of post-acquisition changes in net assets of associates and joint ventures, after eliminating unrealised profits and losses resulting from transactions between the Group and its associates and joint ventures.

• Non-Controlling Interest's share of profit / loss of consolidated subsidiaries for the year is identified and adjusted against the income of the Group in order to arrive at the net income attributable to shareholders of the Company.

Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

- A change in the ownership interest of a subsidiary, without a loss of control, is accounted as an equity transaction. If the Group loses control over a subsidiary, it:
 - Derecognises the assets (including goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost
 - Derecognises the carrying amount of any non-controlling interests
 - Derecognises the cumulative translation differences recorded in equity
 - Recognises the fair value of the consideration received
 - Recognises the fair value of any investment retained
 - Recognises any surplus or deficit in profit or loss
 - Recognise that distribution of shares of subsidiary to Group in Group's capacity as owners
 - Reclassifies the parent's share of components previously recognised in OCI to profit or loss or transferred directly to retained earnings, if required by other Ind ASs as would be required if the Group had directly disposed of the related assets or liabilities

• Foreign Currency Transactions

Functional & presentational currency

The Consolidated financial statements of the foreign subsidiaries, which are consolidated into the consolidated financial statements of the Group, are prepared and the items included in the consolidated financial statements are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated financial statements are prepared in the Indian Rupees which is the Group's presentation currency.

The Group has deemed the cumulative translation differences for foreign operations at the date of transition to be zero. Adjustments to give effect to this are recorded against opening equity. After the date of transition, translation differences arising on translation of foreign operations are recognised in other comprehensive income and included in a separate translation reserve within equity.

Transactions and balances

On initial recognition, all foreign currency transactions are recorded by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the transaction. Gains/Losses arising out of fluctuation in foreign exchange rate between the transaction date and settlement date are recognised in the Statement of Profit and Loss.

All monetary assets and liabilities in foreign currencies are restated at the year end at the exchange rate prevailing at the year end and the exchange differences are recognised in the Statement of Profit and Loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

Conversion

Functional and reporting currencies of foreign operations are different from the reporting currency of the Holding Group. For all the foreign operations of the Group, all assets and liabilities (excluding share capital and opening reserves and surplus) are translated into INR using the exchange rate prevailing at the reporting date. Share capital, reserves and surplus are carried at historical cost. Revenues, costs and expenses are translated using the weighted average exchange rate during the reporting period. The resultant currency translation difference is recognised as foreign currency translation reserve under the head 'Other Equity'. On the disposal of a foreign operation, all of the accumulated exchange differences in respect of that operation attributable to the Group are reclassified to the consolidated statement of profit and loss.

- Current vs non-current classifications:

An operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle. The projects business comprises long-term contracts which have an operating cycle exceeding one year. For classification of current assets and liabilities related to projects business, the Group uses the duration of the contract as its operating cycle.

The Group presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it satisfies below criteria:

- Expected to be realised or intended to be sold or consumed in a normal operating cycle;
- Held for primary purpose of trading.
- Expected to be realised within twelve months after reporting period; or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current assets.

A Liability is classified as current when it satisfies below criteria:

- Expected to settle the liability in normal operating cycle;
- Help primarily for the purpose of trading;
- Due to be settled within twelve months after reporting period; or
- There is no unconditional right to defer the settlement of liability for at least twelve months after reporting period.

All other liabilities are classified as non-current liabilities.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

- Property, plant and equipment (PPE)

Property, Plant and Equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Cost comprises the purchase price, including import duties and non-refundable purchase taxes, and any directly attributable cost of bringing the asset to its working condition for its intended use. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to Statement of Profit and Loss during the year in which they are incurred.

Gains or losses arising from de-recognition of a property, plant and equipment are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognized.

PPE not ready for the intended use on the date of the Balance Sheet are disclosed as "capital work-in-progress".

- Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

- Depreciation/amortization

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value which is taken as nil.

Depreciation is provided on the Straight Line Method as per the rates derived from the balance useful lives of relevant classes of assets prescribed in Schedule II of Companies Act, 2013. Depreciation has been provided on pro-rata basis from the date the assets are put to use during the financial year. In respect of asset sold or disposed off during the year, depreciation is provided till the date of sale/disposal/adjustments of the assets.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The estimated useful lives of assets and residual values are reviewed regularly and, when necessary, and adjusted prospectively, if appropriate

Leasehold improvements are amortized over the lease period, which corresponds with the useful lives of the assets.

The company amortized intangible assets over their estimated useful lives using the straight-line method (SLM).

- Lease

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

Group as a lessor

Lease income from operating leases where the Group is a lessor is recognised in income on a straight-line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. The respective leased assets are included in the balance sheet based on their nature.

- Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis from the commencement date over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

The right-of-use assets are also subject to impairment. Refer to the accounting policies in section (O) Impairment of non-financial assets.

- Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Lease liabilities and Right-of-use assets have been presented as a separate line in the balance sheet. Lease payments have been classified as cash used in financing activities.

- Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for short-term leases of all assets that have a lease term of 12 months or less and leases of low-value assets. The Group recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease.

- Investment Property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Group, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

Investment properties are subsequently measured at cost less depreciation. Investment properties are depreciated using the straight-line method over their estimated useful lives.

- Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

- Financial asset

- Initial recognition and measurement

All financial assets are initially recognized at fair value. Transaction costs will be considered as part of the cost of acquisition that are directly attributable to the acquisition or issue of financial assets, which are measured through Fair Value Through Profit and Loss (FVTPL). Purchase and sale of financial assets are recognised using trade date accounting.

Fair value Measurement

The Group measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer liability takes place either:

? In the principal market for the asset or liability, or

? In the absence of a principal market, in the most advantageous market for the asset or liability accessible to the Company.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group business model for managing them. All financial assets are recognised initially at fair value plus transaction costs that are attributable to the acquisition of the financial assets in the case of financial assets not recorded at fair value through profit or loss, however transaction costs directly attributable to the acquisition of financial assets at fair value through profit and loss are immediately recognised in the statement of profit and loss. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

- Subsequent measurement

- Financial assets measured at amortised cost

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the

Contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- Financial assets measured at Fair Value Through Other Comprehensive Income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For Equity investments the Group has elected to recognize changes in the fair value of certain investments in equity securities in other comprehensive income. These changes are accumulated within the FVOCI equity investments reserve within equity.

- Financial Assets measured at Fair Value Through Profit or Loss (FVTPL)

A financial asset which is not classified in any of the above categories is measured at FVTPL.

Investment in equity instruments issued by subsidiary, associate and joint venture companies are measured at cost less impairment.

- Loans to employees and other entities

Loans given to employees and other entities are repayable to the company on demand and hence are carried at cost in the financial statements.

- Impairment of financial assets

The Company recognizes loss allowance using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all financial assets with contractual cash flows other than trade receivable, ECLs are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of ECLs (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised as an impairment gain or loss in the Statement of Profit and Loss.

- Financial liabilities

- Financial liabilities: initial recognition and measurement

All financial liabilities are recognized at fair value and in case of borrowings, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

- Financial liabilities: subsequent measurement

Financial liabilities are carried at amortized cost using the Effective interest rate (EIR) method.

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

c) Loans and borrowings

This is the category most relevant to the Group. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in statement of profit and loss when the liabilities are derecognised as well as through the EIR amortization process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

- De-recognition of financial instruments

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the

Company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.

- Offsetting

Financial assets and financial liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Group has a legally enforceable right to set off the amount and it intends, either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

- Employee benefits:

- Short term employee benefits

Employee benefits such as salaries, wages, short-term compensated absences, bonus, ex-gratia and performance-linked rewards falling due wholly within twelve months of rendering the service are classified as short-term employee benefits and are expensed in the period in which the employee renders the service.

- Post-employment benefits

- Defined contribution plan:

- Provident fund

The Group superannuation scheme, state governed provident fund scheme, employee state insurance scheme and employee pension scheme are defined contribution plans. The contribution paid/payable under the schemes is recognised during the period in which the employee renders the service. The Group has no obligation, other than the contribution payable to the provident fund. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

- Defined benefits plan:

The Group provides for gratuity, a defined benefit plan (the 'Gratuity Plan') covering eligible employees in accordance with the Payment of Gratuity Act, 1972. Gratuity liability is a defined benefit obligation and is provided on the basis of its actuarial valuation based on the projected unit credit method made at each Balance Sheet date. The Company funds gratuity benefits for its employees within the limits prescribed under The Payment of Gratuity (Amendment) Act, 2018 through contributions to a Scheme administered by the Life Insurance Corporation of India ('LIC').

Remeasurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

- Other long-term employee benefit obligations

Compensated absences: The employees can carry-forward a portion of the unutilised accrued compensated absences and utilise it in future service periods or receive cash compensation on termination of employment. Since, the compensated absences do not fall due wholly within twelve months after the end of the period in which the employees render the related service and are also not expected to be utilised wholly within twelve months after the end of such period, the benefit is classified as a long-term employee benefit. The Group records an obligation for such compensated absences in the period in which the employee renders the services that increase their entitlement. The obligation is measured on the basis of independent actuarial valuation using the projected unit credit method on the Balance Sheet date.

- Income taxes

Tax expenses comprise of current and deferred tax.

- Current Tax:

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

- Deferred Tax:

Deferred tax is recognised on temporary difference between the carrying amount of assets and liabilities in the Financial Statements and the corresponding tax based used in computation of taxable profit.

Deferred tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilized.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

- Inventories

Inventories are valued after providing for obsolescence, as under:

- Raw materials, components, construction materials, stores, spares and loose tools at lower of weighted average cost or net realisable value. However, these items are considered to be realisable at cost if the finished products in which they will be used, are expected to be sold at or above cost. Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition
- Finished goods and stock-in-trade (in respect of goods acquired for trading) at lower of weighted average cost or net realisable value. Cost includes costs of purchases, costs of conversion and other costs incurred in bringing the inventories to their present location. Taxes which are subsequently recoverable from taxation authorities are not included in the cost.

Assessment of net realisable value is made at each reporting period end and when the circumstances that previously caused inventories to be written-down below cost no longer exist or when there is clear evidence of an increase in net realisable value because of changed economic circumstances, the write-down, if any, in the past period is reversed to the extent of the original amount written-down so that the resultant carrying amount is the lower of the cost and the revised net realisable value.

- Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

The Company transfers control of a good or service over time and therefore satisfies a performance obligation and recognises revenue over a period of time if one of the following criteria is met:

- the customer simultaneously consumes the benefit of the Company's performance or
- the customer controls the asset as it is being created/enhanced by the Company's performance or
- there is no alternative use of the asset and the Company has either explicit or implicit right of payment considering legal precedents,

In all other cases, performance obligation is considered as satisfied at a point in time.

The revenue is recognised to the extent of transaction price allocated to the performance obligation satisfied. Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer excluding amounts collected on behalf of a third party. The Company includes variable consideration as part of transaction price when there is a basis to reasonably estimate the amount of the variable consideration and when it is probable that a significant reversal of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is resolved. Variable consideration is estimated using the expected value

method or most likely amount as appropriate in a given circumstance. Payment terms agreed with a customer are as per business practice and the financing component, if significant, is separated from the transaction price and accounted as interest income. Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in profit or loss immediately in the period in which such costs are incurred. Incremental costs of obtaining a contract, if any, and costs incurred to fulfil a contract are amortised over the period of execution of the contract in proportion to the progress measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Significant judgments are used in:

- Determining the revenue to be recognised in case of performance obligation satisfied over a period of time; revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation.
- Determining the expected losses, which are recognised in the period in which such losses become probable based on the expected total contract cost as at the reporting date.
- Determining the method to be applied to arrive at the variable consideration requiring an adjustment to the transaction price

• Revenue from operations

Revenue includes adjustments made towards liquidated damages and variation wherever applicable. Escalation and other claims, which are not ascertainable/acknowledged by customers are not taken into account.

- Revenue from sale of manufactured and traded goods including contracts for supply/commissioning of complex plant and equipment is recognised as follows:

Revenue is recognised when the control of the same is transferred to the customer and it is probable that the Company will collect the consideration to which it is entitled for the exchanged goods. Revenue from commissioning of complex plant and equipment is recognised either 'over time' or 'in time' based on an assessment of the transfer of control as per the terms of the contract.

• Revenue from construction/project related activity is recognised as follows:

- Cost plus contracts: Revenue from cost plus contracts is recognised over time and is determined with reference to the extent performance obligations have been satisfied. The amount of transaction price allocated to the performance obligations satisfied represents the recoverable costs incurred during the period plus the margin as agreed with the customer.
- Fixed price contracts: Contract revenue is recognised over time to the extent of performance obligation satisfied and control is transferred to the customer. Contract revenue is recognised at allocable transaction price which represents the cost of work performed on the contract plus proportionate margin, using the percentage of completion method. Percentage of completion is the proportion of cost of work performed to-date, to the total estimated contract costs.

For contracts where the aggregate of contract cost incurred to date plus recognised profits (or minus recognised losses as the case may be) exceeds the progress billing, the surplus is shown as contract asset and termed as "Due from customers". For contracts where progress billing exceeds the aggregate of contract costs incurred to-date plus recognised profits (or minus recognised losses, as the case may be), the surplus is shown as contract liability and termed as "Due to customers". Amounts received before the related work is performed are disclosed in the Balance Sheet as contract liability and termed as "Advances from customer". The amounts billed on customer for work performed and are unconditionally due for payment i.e. only passage of time is required before payment falls due, are disclosed in the Balance Sheet as trade receivables. The amount of retention money held by the customers pending completion of performance milestone is disclosed as part of contract asset and is reclassified as trade receivables when it becomes due for payment. Impairment loss (termed as provision for foreseeable losses in the financial statements) is recognised in profit or loss to the extent the carrying amount of the contract asset exceeds the remaining amount of consideration that the Company expects to receive towards remaining performance obligations (after deducting the costs that relate directly to fulfill such remaining performance obligations). The Company recognises impairment loss (termed as provision for expected credit loss on contract assets in the financial statements) on account of credit risk in respect of a contract asset using expected credit loss model on similar basis as applicable to trade receivables.

- Revenue from rendering of services is recognised over time as the customer receives the benefit of the Company's performance and the Company has an enforceable right to payment for services transferred. Unbilled revenue represents value of services performed in accordance with the contract terms but not billed

• Container Freight station services

- Income from cargo handling services is recognised as and when the related services are performed as per the contractual terms agreed with the customers. Revenue from providing services is recognised in the accounting period in which the services are rendered.
- Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of indirect taxes, trade allowances, rebates and amounts collected on behalf of third parties and is not recognised in instances where there is uncertainty with regard to ultimate collection. In such cases revenue is recognised on reasonable certainty of collection.
- Revenue from storage and warehousing is recognised prorata based on the period the container is kept in the Container freight station. However,

in case of long standing containers, the revenue is accounted on the accrual basis to the extent, it is not unreasonable to expect ultimate collection.

- In an agency relationship, the commission income / service fee revenue is recorded on a net basis (net of cost incurred) and cost incurred is netted off with the relevant expenses incurred, since these are incurred on behalf of other parties.

- Multimodal transport operations

- Revenue from Export service is recognised on sailing of vessel and revenue from import services is recognised upon rendering of related services.

- Third Party Logistics income
- Third party logistic service charges and management fees are recognized as and when the service is performed as per contractual terms.
- Income from Transportation service are recognised as and when the services are performed as per Contractual terms.
- Reimbursement of cost is netted off with the relevant expenses incurred since the same are incurred on behalf of the customer.

- Other income

- Interest income on investments and loans is accrued on a time basis by reference to the principal outstanding and the effective interest rate including interest on investments classified as fair value through profit or loss or fair value through other comprehensive income. Interest receivable on customer dues is recognised as income in the Statement of Profit and Loss on accrual basis provided there is no uncertainty of realisation.

- Dividend income is accounted in the period in which the right to receive the same is established.

- Government grants, which are revenue in nature and are towards compensation for the qualifying costs incurred by the Company, are recognised as other income/reduced from underlying expenses in profit or loss in the period in which such costs are incurred. Government grants related to an asset are reduced from the cost of an asset until the asset is ready to use and the grant post that is presented as deferred income. Subsequently the grant is recognised as income in profit or loss on a systematic basis over the expected useful life of the related asset. Government grant receivable in the form of duty credit scrips is recognised as other income in the Statement of Profit and Loss in the period in which the application is made to the government authorities and to the extent there is no uncertainty towards its receipt.

- Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

- Onerous Contract

If the Group has a contract that is onerous, the present obligation under the contract is recognized and measured as a provision. However, before a separate provision for an onerous contract is established, the Group recognizes any impairment loss that has occurred on assets dedicated to that contract. An onerous contract is a contract under which the unavoidable costs (i.e. the costs that the Company cannot avoid because it has the contract) of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it.

- Borrowing costs:

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as a part of the cost of assets during the period of time that is required to complete and prepare the asset for its intended use or sale. Qualifying assets are assets that necessarily take a substantial period of time to get ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

Borrowing cost consist of interest (calculated using effective rate of interest method) and other cost that an entity incurred in connection with the borrowing cost.

Other borrowing costs are expensed in the period in which they are incurred.

- Provisions, contingent liabilities & contingent assets

General

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

Long-term provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money. Short term provisions are carried at their redemption value and are not offset against receivables from reimbursements.

Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Contingent Assets

A contingent asset is not recognized unless it becomes virtually certain that an inflow of economic benefits will arise. When an inflow of economic benefits is probable, contingent assets are disclosed in the financial statements

- Impairment of Assets:

As at the end of each financial year, the carrying amounts of PPE, investment property, intangible assets and investments in subsidiary are reviewed to determine whether there is any indication that those assets have suffered an impairment loss. If such indication exists, PPE, investment property and intangible assets are tested for impairment so as to determine the impairment loss, if any. Intangible assets with indefinite life are tested for impairment each year. Impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is determined:

- in the case of an individual asset, at the higher of the fair value less costs to sell and the value-in-use; and
- in the case of a cash generating unit (the smallest identifiable group of assets that generates independent cash flows), at the higher of the cash generating unit's fair value less costs to sell and the value-in-use.

The amount of value-in-use is determined as the present value of estimated future cash flows from the continuing use of an asset, which may vary based on the future performance of the Company and from its disposal at the end of its useful life. For this purpose, the discount rate (pre-tax) is determined based on the weighted average cost of capital of the company suitably adjusted for risks specified to the estimated cash flows of the asset. If recoverable amount of an asset (or cash generating unit) is estimated to be less than its carrying amount, such deficit is recognised immediately in the Statement of Profit and Loss as impairment loss and the carrying amount of the asset (or cash generating unit) is reduced to its recoverable amount. When an impairment loss subsequently reverses, the carrying amount of the asset (or cash generating unit) is increased to the revised estimate of its recoverable amount, such that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit and Loss.

- Foreign currency transactions

Foreign currency transactions are recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

Foreign currency transactions other than export sales are recorded at rates of exchange prevailing on the date of transaction. Export sales are accounted for at monthly average exchange rates. Monetary assets and liabilities denominated in foreign currencies as at the balance sheet date are translated at the rate of exchange prevailing at the year-end. Exchange differences arising on actual payments / realizations and year-end restatements are dealt with in the Statement of Profit and Loss.

Monetary items denominated in foreign currency are revalued at the rates of exchange as on the Balance Sheet date and Exchange differences arising on settlement or translation of monetary items are recognised in statement of profit and loss. Exchange differences on foreign currency borrowings, are accounted for and disclosed under 'finance cost'.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the date of the transaction.

- Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

- Segment reporting

Operating segments are those components of the business whose operating results are regularly reviewed by the chief operating decision making body in the Company to make decisions for performance assessment and resource allocation. The reporting of segment information is the same as provided to the management for the purpose of the performance assessment and resource allocation to the segments. Segment accounting policies are in line with the accounting policies of the Company. In addition, the following specific accounting policies have been followed for segment reporting:

- Segment revenue includes sales and other operational revenue directly identifiable with/allocable to the segment including inter segment revenue.
- Expenses that are directly identifiable with/allocable to segments are considered for determining the segment result.
- Most of the common costs are allocated to segments mainly on the basis of the respective segment revenue estimated at the beginning of the reporting period.
- Income which relates to the Company as a whole and not allocable to segments is included in "unallocable corporate income/(expenditure)(net)".
- Segment result represents profit before interest and tax and includes margins on inter-segment capital jobs, which are reduced in arriving at the profit before tax of the Company.
- Segment result includes the finance costs incurred on interest bearing advances with corresponding credit included in "unallocable corporate income/(expenditure)(net)".
- Segment results have not been adjusted for any exceptional item.
- Segment assets and liabilities include those directly identifiable with the respective segments. Unallocable corporate assets and liabilities represent the assets and liabilities that relate to the Company as a whole.
- Segment non-cash expenses forming part of segment expenses and is allocated to the segment.
- Segment revenue resulting from transactions with other business segments is accounted on the basis of transfer price which are either determined to yield a desired margin or agreed on a negotiated basis.

- Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss [excluding other comprehensive income] for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share are the net profit after tax for the year. The weighted average numbers of equity shares outstanding during the period are adjusted for events of bonus issue and sub-division of shares.

For the purpose of calculating diluted earnings per share, the net profit or loss [excluding other comprehensive income] for the year attributable to equity share holders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

- Convertible preference shares

Convertible preference shares are separated into liability and equity components based on the terms of the contract.

On issuance of the convertible preference shares, the fair value of the liability component is determined using a market rate for an equivalent non-convertible instrument. This amount is classified as a financial liability measured at amortised cost (net of transaction costs) until it is extinguished on conversion or redemption.

The remainder of the proceeds is allocated to the conversion option that is recognised and included in equity since conversion option meets Ind AS 32 criteria for fixed to fixed classification. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not remeasured in subsequent years.

Transaction costs are apportioned between the liability and equity components of the convertible preference shares based on the allocation of proceeds to the liability and equity components when the instruments are initially recognised.

- Recent accounting pronouncements and changes in accounting standards

Ministry of Affairs (“MCA”) notified new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On 23rd March 2022, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2022 applicable from April 2022, as below:

Ind AS 103 – Reference to Conceptual Framework The amendments specify that to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Conceptual Framework for Financial Reporting under Indian Accounting Standards (Conceptual Framework) issued by the Institute of Chartered Accountants of India at the acquisition date. These changes do not significantly change the requirements of Ind AS 103. The Group does not expect the amendment to have any significant impact in its financial statements.

Ind AS 16 - Proceeds before intended use the amendments mainly prohibit an entity from deducting from the cost of property, plant and equipment amounts received from selling items produced while the group is preparing the asset for its intended use. Instead, an entity will recognise such sales proceeds and related cost in statement of profit or loss. The Group does not expect the amendments to have any impact in its recognition of its property, plant and equipment in its financial statements.

Ind AS 37- Provisions, Contingent Liabilities and contingent assets the amendment specifies that the cost of fulfilling a contract comprises the costs that relate directly to the contract. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts (an example would be the allocation of the depreciation charge for an item of property plant and equipment used in fulfilling the contract). The effective date for adoption of this amendment is annual periods beginning on or after April 1 2022, although early adoption is permitted. The Company has evaluated the amendment and the impact is not expected to be material.

- Use of judgements, estimates and assumptions

In preparing these standalone financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Assumptions and estimation uncertainties

Assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment recognised in the standalone financial statements are as under :

- measurement of useful life, residual values and impairment of property, plant and equipment,
- recognition of deferred tax assets: availability of future taxable profit against which temporary differences shall be deductible,
- measurement of defined benefit obligations and planned assets: key actuarial assumptions, recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources,
- impairment of financial assets and non-financial assets,
- revenue and margin recognition on construction and / or long term service contracts and related provision.

	14,551	12,947

Foot Note:

For the year ending 31st
March 2024, Fair Valuation for
the investment properties
located outside India is taken as
cost of purchase including any
expenditure being incurred for
the maintenance of the
property.

(c) For the year ending 31st
March 2024, the fair value of
the investment property has
been determined by a registered

valuer as defined under rule 2 of Companies (Registered Valuers and Valuation) Rules, 2017, external, independent property valuer, having appropriate qualifications and recent experience in the valuation of properties in the relevant locations and category of the properties being valued. The fair value has been determined based upon the market comparable approach that reflects recent transaction prices for similar properties. The fair value measurement is categorised in Level 3 fair value based on the inputs to the valuation technique used. (Refer Note 52 for definition of Level 3 fair value measurement)
 The Company has no restrictions on the realisability of its investment properties and no contractual obligations to purchase, construct or develop investment properties or for repairs, maintenance and enhancements.
 The investment properties consist of commercial properties in India. The Management has determined the investment properties as commercial properties based on the nature of their usage. There has been no change to the valuation technique during the year.

	14,551	12,947

Foot Note:

For the year ending 31st
March 2024, Fair Valuation for
the investment properties
located outside India is taken as
cost of purchase including any
expenditure being incurred for
the maintenance of the
property.

(c) For the year ending 31st
March 2024, the fair value of
the investment property has
been determined by a registered

valuer as defined under rule 2 of Companies (Registered Valuers and Valuation) Rules, 2017, external, independent property valuer, having appropriate qualifications and recent experience in the valuation of properties in the relevant locations and category of the properties being valued. The fair value has been determined based upon the market comparable approach that reflects recent transaction prices for similar properties. The fair value measurement is categorised in Level 3 fair value based on the inputs to the valuation technique used. (Refer Note 52 for definition of Level 3 fair value measurement)
 The Company has no restrictions on the realisability of its investment properties and no contractual obligations to purchase, construct or develop investment properties or for repairs, maintenance and enhancements.
 The investment properties consist of commercial properties in India. The Management has determined the investment properties as commercial properties based on the nature of their usage. There has been no change to the valuation technique during the year.

I. Fair value hierarchy

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to Level 3, as described below:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

Particulars	As at 31st March, 2024			
	Level 1	Level 2	Level 3	Total
Financial assets				
Investments	7,639	12,954	-	20,594

Investments	4,565	9,462	-	14,027
Hedged Assets	-	-	-	-

Valuation Technique used to determine Fair Value

The Group maintains policies and procedures to value financial assets or financial liabilities using the best and most relevant data available.

The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The following methods and assumptions were used to estimate the fair values:

- 1) Fair value of cash and deposits, trade receivables, trade payables, and other current financial assets and liabilities measured at amortized cost is approximate to their carrying amounts largely due to the short-term maturities of these instruments. The fair value of other non-current financial assets and liabilities (security deposit taken/given and advance to employees) carried at amortized cost is approximately equal to fair value. Hence carrying value and fair value is taken same.
- 2) Long-term variable-rate borrowings measured at amortized cost are evaluated by the Group based on parameters such as interest rates, specific country risk factors, credit risk and other risk characteristics. Fair value of variable interest rate borrowings approximates their carrying values. Risk of other factors for the Group is considered to be insignificant in valuation.

Valuation Technique used to determine Fair Value

The Group maintains policies and procedures to value financial assets or financial liabilities using the best and most relevant data available.

The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The following methods and assumptions were used to estimate the fair values:

- 1) Fair value of cash and deposits, trade receivables, trade payables, and other current financial assets and liabilities measured at amortized cost is approximate to their carrying amounts largely due to the short-term maturities of these instruments. The fair value of other non-current financial assets and liabilities (security deposit taken/given and advance to employees) carried at amortized cost is approximately equal to fair value. Hence carrying value and fair value is taken same.
- 2) Long-term variable-rate borrowings measured at amortized cost are evaluated by the Group based on parameters such as interest rates, specific country risk factors, credit risk and other risk characteristics. Fair value of variable interest rate borrowings approximates their carrying values. Risk of other factors for the Group is considered to be insignificant in valuation.

Textual information (50)

Description of accounting policy for measuring inventories [Text Block]

• Inventories

Inventories are valued after providing for obsolescence, as under:

- Raw materials, components, construction materials, stores, spares and loose tools at lower of weighted average cost or net realisable value. However, these items are considered to be realisable at cost if the finished products in which they will be used, are expected to be sold at or above cost. Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition
- Finished goods and stock-in-trade (in respect of goods acquired for trading) at lower of weighted average cost or net realisable value. Cost includes costs of purchases, costs of conversion and other costs incurred in bringing the inventories to their present location. Taxes which are subsequently recoverable from taxation authorities are not included in the cost.

Assessment of net realisable value is made at each reporting period end and when the circumstances that previously caused inventories to be written-down below cost no longer exist or when there is clear evidence of an increase in net realisable value because of changed economic circumstances, the write-down, if any, in the past period is reversed to the extent of the original amount written-down so that the resultant carrying amount is the lower of the cost and the revised net realisable value.

62 Commitments & Onerous Contract

Commitments

The Group did not have any other long term commitments including derivative contracts or material non-cancellable contractual commitments/ contracts for which there were any foreseeable losses which might have material impact on the financial statements.

Estimated amount of Contract remaining to be executed for capital account and not provided for

Particulars	As at March 31, 2024	As at March 31, 2023
Commitment	-	-

Onerous contract

If the Company has a contract that is onerous, the present obligation under the contract is recognised and measured as a provision. However, before a separate provision for an onerous contract is established, the Company recognises any impairment loss that has occurred on assets dedicated to that contract. An onerous contract is a contract under which the unavoidable costs (i.e. the costs that the Company cannot avoid because it has the contract) of meeting the obligations under the contract exceed the

economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and

any compensation or penalties arising from failure to fulfil it.

58 Financial risk management objectives and policies

The Company's principal financial liabilities, other than derivatives, comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations to support its operations. The Company's principal financial assets include loans, trade receivables, and cash and cash equivalents that derive directly from its operations. The Company also holds investments in debt and equity instruments and enters into derivative transactions.

The Company is exposed to various financial risks. These risks are categorized into market risk, credit risk and liquidity risk. The Company's risk management is coordinated by the Board of Directors and focuses on securing long term and short term cash flows. The Company does not engage in trading of financial assets for speculative purposes.

i. Credit Risk:

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments. The Company only deals with parties which has good credit rating/ worthiness given by external rating agencies or based on Company's internal assessment.

The Company's exposure and credit ratings of its counterparties are continuously monitored and the aggregate value of transactions is reasonably spread amongst the counterparties. Credit risk arising from derivative financial instruments and other balances with banks is limited and there is no collateral held against these because the counterparties are banks and recognised financial institutions with high credit ratings assigned by the international credit rating agencies. The average credit period ranges from 60 to 90 days on sales of products and services. Credit risk arising from trade receivables is managed in accordance with the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on a detailed study of credit worthiness and accordingly individual credit limits are defined/modified. The concentration of credit risk is limited due to the fact that the customer base is large. There may be delays, generally not exceeding one year but the risk in respect of realisation of dues is minimal. The Company has considered the default period of more than three years.

The Company has used a practical & expedient approach for computing the expected credit loss allowance for trade receivables based on a provision matrix. This matrix takes into account historical credit loss experience, adjusted for forward-looking information. The expected credit loss allowance is based on the ageing of the days the receivables are due .

ii. Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet commitments associated with financial instruments that are settled by delivering cash or another financial asset. Liquidity risk may result from an inability to sell a financial asset quickly at close to its fair value. The Company has an established liquidity risk management framework for managing its short term, medium term and long term funding and liquidity management requirements. The Company's exposure to liquidity risk arises primarily from mismatches of the maturities of financial assets and liabilities. The Company manages the liquidity risk by maintaining adequate funds in cash and cash equivalents. The Company also has adequate credit facilities agreed with banks to ensure that there is sufficient cash to meet all its normal operating commitments in a timely and cost-effective manner.

The Company believes that its current liquidity position, and anticipated future internally generated funds from operations, will enable it to meet its future known obligations in the ordinary course of business.

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted

As at March 31, 2024

	Carrying amount	Contract cash flow
Particulars	Less than one year	More than one year
Trade payables	21,872	21,150

Borrowings	34,043	14,178
Lease liabilities	559	83
	48,582	27,563

* Contractual cash flow includes the interest to be incurred and paid in subsequent periods

iii Market risk

Market risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

A) Currency risk

Currency risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company is exposed to the effects of fluctuation in the prevailing foreign currency exchange rates on its financial position and

cash flows. Exposure arises primarily due to exchange rate fluctuations between the functional currency and other currencies from the Company's operating, investing and financing activities.

Exposure to currency risk

The summary of quantitative data about the Company's exposure to currency risk, as expressed in Indian Rupees, as at March 31, 2024 and as at March 31, 2023.

Particulars	Currency As at March 31, 2024		
	Foreign Currency	Rs (In Lacs)	Foreign Currency

Sensitivity analysis

A reasonably possible strengthening (weakening) of the Indian Rupee against below currencies at March 31, 2024 (previous year ended as on March 31, 2023) would have affected the measurement of financial instruments denominated in functional currency and affected equity and profit or loss by the amounts shown below. This analysis is performed on foreign currency denominated monetary financial assets and financial liabilities outstanding as at the year end. This analysis is based on a change (depreciation / appreciation) of 5% and assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

Profit or
before ta

Particulars	Strength
For the year ended March 31, 2024	
Financial Assets	363
Financial Liability	(161)
Total	202
For the year ended March 31, 2023	
Financial Assets	543
Financial Liability	(262)
Total	280

B. Interest Rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates. The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings.

Interest rate risk exposure

Below is the overall exposure of the Company to interest rate risk:

Particulars

Variable rate borrowing

Fixed rate borrowing

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

For the year ended March 31, 2024

Impact due to increase by 100 basis Points	402
Impact due to decrease by 100 basis Points	(402)

For the year ended March 31, 2023

Impact due to increase by 100 basis Points	236
Impact due to decrease by 100 basis Points	(236)

iv Other Risk

Other Price Risk:

Other price risk is the risk that the fair value of a financial instrument will fluctuate due to changes in market traded price. Other price risk arises from financial assets such as investments in equity instruments . The Company is exposed to price risk arising mainly from investments in equity instruments recognised at FVTOCI. As at 31st March, 2024, the carrying value of such equity instruments recognised at FVTOCI amounts to Rs. 3075 lakhs (March 31, 2023 Rs. 379 lakhs). The details of such investments in equity instruments are given in Note 89.

The Company is mainly exposed to change in market rates of its investments in equity instrument recognised at FVTOCI. A sensitivity analysis demonstrating the impact of change in market prices of these instruments from the prices existing as at the reporting date is given below: If the equity instrument prices had been higher/lower by 20% from the market prices existing as at 31st March, 2024, Other Comprehensive Income for the year ended 31st March, 2024 would increase by Rs. 2292 lakh (March 31, 2023 Rs. 457 lakh) and decrease by Rs. 2292 lakh (March 31, 2023 Rs. 304 lakh) respectively with a corresponding increase/decrease in Total Equity of the Company as at 31st March, 2023. 20% represents management's assessment of reasonably possible change in equity index

prices.

62 Commitments & Onerous Contract

Commitments

The Group did not have any other long term commitments including derivative contracts or material non-cancellable contractual commitments/ contracts for which there were any foreseeable losses which might have material impact on the financial statements.

Estimated amount of Contract remaining to be executed for capital account and not provided for

Particulars	As at March 31, 2024	As at March 31, 2023
Commitment	-	-

Onerous contract

If the Company has a contract that is onerous, the present obligation under the contract is recognised and measured as a provision. However, before a separate provision for an onerous contract is established, the Company recognises any impairment loss that has occurred on assets dedicated to that contract. An onerous contract is a contract under which the unavoidable costs (i.e. the costs that the Company cannot avoid because it has the contract) of meeting the obligations under the contract exceed the

economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and

any compensation or penalties arising from failure to fulfil it.

58 Financial risk management objectives and policies

The Company's principal financial liabilities, other than derivatives, comprise loans and borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations to support its operations. The Company's principal financial assets include loans, trade receivables, and cash and cash equivalents that derive directly from its operations. The Company also holds investments in debt and equity instruments and enters into derivative transactions.

The Company is exposed to various financial risks. These risks are categorized into market risk, credit risk and liquidity risk. The Company's risk management is coordinated by the Board of Directors and focuses on securing long term and short term cash flows. The Company does not engage in trading of financial assets for speculative purposes.

i. Credit Risk:

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments. The Company only deals with parties which has good credit rating/ worthiness given by external rating agencies or based on Company's internal assessment.

The Company's exposure and credit ratings of its counterparties are continuously monitored and the aggregate value of transactions is reasonably spread amongst the counterparties. Credit risk arising from derivative financial instruments and other balances with banks is limited and there is no collateral held against these because the counterparties are banks and recognised financial institutions with high credit ratings assigned by the international credit rating agencies. The average credit period ranges from 60 to 90 days on sales of products and services. Credit risk arising from trade receivables is managed in accordance with the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on a detailed study of credit worthiness and accordingly individual credit limits are defined/modified. The concentration of credit risk is limited due to the fact that the customer base is large. There may be delays, generally not exceeding one year but the risk in respect of realisation of dues is minimal. The Company has considered the default period of more than three years.

The Company has used a practical & expedient approach for computing the expected credit loss allowance for trade receivables based on a provision matrix. This matrix takes into account historical credit loss experience, adjusted for forward-looking information. The expected credit loss allowance is based on the ageing of the days the receivables are due .

ii. Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet commitments associated with financial instruments that are settled by delivering cash or another financial asset. Liquidity risk may result from an inability to sell a financial asset quickly at close to its fair value. The Company has an established liquidity risk management framework for managing its short term, medium term and long term funding and liquidity management requirements. The Company's exposure to liquidity risk arises primarily from mismatches of the maturities of financial assets and liabilities. The Company manages the liquidity risk by maintaining adequate funds in cash and cash equivalents. The Company also has adequate credit facilities agreed with banks to ensure that there is sufficient cash to meet all its normal operating commitments in a timely and cost-effective manner.

The Company believes that its current liquidity position, and anticipated future internally generated funds from operations, will enable it to meet its future known obligations in the ordinary course of business.

The following are the remaining contractual maturities of financial liabilities at the reporting date. The amounts are gross and undiscounted

As at March 31, 2024

Particulars	Carrying amount	Contract cash flow
	Less than one year	More than one year
Trade payables	21,872	21,150
Other financial liabilities *	3,507	2,655
Borrowings	40,188	12,863
Lease liabilities	791	77
	66,357	36,695

As at March 31, 2023

Particulars	Carrying amount	Contract cash flow
	Less than one year	More than one year
Trade payables	12,169	12,111
Other financial liabilities *	1,811	1,191
Borrowings	34,043	14,178
Lease liabilities	559	83
	48,582	28,563

* Contractual cash flow includes the interest to be incurred and paid in subsequent periods

iii Market risk

Market risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

A) Currency risk

Currency risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company is exposed to the effects of fluctuation in the prevailing foreign currency exchange rates on its financial position and

cash flows. Exposure arises primarily due to exchange rate fluctuations between the functional currency and other currencies from the Company's operating, investing and financing activities.

Exposure to currency risk

The summary of quantitative data about the Company's exposure to currency risk, as expressed in Indian Rupees, as at March 31, 2024 and as at March 31, 2023.

Particulars	Currency As at March 31, 2024		
	Foreign Currency	Rs (In Lacs)	Foreign Currency
Financial assets			
Trade receivables			
	USD	32,58,340	2,691
	EURO	3,47,473	308

Sensitivity analysis

A reasonably possible strengthening (weakening) of the Indian Rupee against below currencies at March 31, 2024 (previous year ended as on March 31, 2023) would have affected the measurement of financial instruments denominated in functional currency and affected equity and profit or loss by the amounts shown below. This analysis is performed on foreign currency denominated monetary financial assets and financial liabilities outstanding as at the year end. This analysis is based on a change (depreciation / appreciation) of 5% and assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

Profit or
before ta

Particulars	Strength
For the year ended March 31, 2024	
Financial Assets	363
Financial Liability	(161)
Total	202
For the year ended March 31, 2023	
Financial Assets	543
Financial Liability	(262)
Total	280

B. Interest Rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates. The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings.

Interest rate risk exposure

Below is the overall exposure of the Company to interest rate risk:

Particulars

Variable rate borrowing

Fixed rate borrowing

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

For the year ended March 31, 2024

Impact due to increase by 100 basis Points	402
Impact due to decrease by 100 basis Points	(402)

For the year ended March 31, 2023

Impact due to increase by 100 basis Points	236
Impact due to decrease by 100 basis Points	(236)

iv Other Risk

Other Price Risk:

Other price risk is the risk that the fair value of a financial instrument will fluctuate due to changes in market traded price. Other price risk arises from financial assets such as investments in equity instruments . The Company is exposed to price risk arising mainly from investments in equity instruments recognised at FVTOCI. As at 31st March, 2024, the carrying value of such equity instruments recognised at FVTOCI amounts to Rs. 3075 lakhs (March 31, 2023 Rs. 379 lakhs). The details of such investments in equity instruments are given in Note 89.

The Company is mainly exposed to change in market rates of its investments in equity instrument recognised at FVTOCI. A sensitivity analysis demonstrating the impact of change in market prices of these instruments from the prices existing as at the reporting date is given below: If the equity instrument prices had been higher/lower by 20% from the market prices existing as at 31st March, 2024, Other Comprehensive Income for the year ended 31st March, 2024 would increase by Rs. 2292 lakh (March 31, 2023 Rs. 457 lakh) and decrease by Rs. 2292 lakh (March 31, 2023 Rs. 304 lakh) respectively with a corresponding increase/decrease in Total Equity of the Company as at 31st March, 2023. 20% represents management's assessment of reasonably possible change in equity index

prices.

Description of accounting policy for recognition of revenue [Text Block]

- Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

For performance obligation satisfied over time, the revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation. The progress is measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

The Company transfers control of a good or service over time and therefore satisfies a performance obligation and recognises revenue over a period of time if one of the following criteria is met:

- the customer simultaneously consumes the benefit of the Company's performance or
- the customer controls the asset as it is being created/enhanced by the Company's performance or
- there is no alternative use of the asset and the Company has either explicit or implicit right of payment considering legal precedents,

In all other cases, performance obligation is considered as satisfied at a point in time.

The revenue is recognised to the extent of transaction price allocated to the performance obligation satisfied. Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer excluding amounts collected on behalf of a third party. The Company includes variable consideration as part of transaction price when there is a basis to reasonably estimate the amount of the variable consideration and when it is probable that a significant reversal of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is resolved. Variable consideration is estimated using the expected value method or most likely amount as appropriate in a given circumstance. Payment terms agreed with a customer are as per business practice and the financing component, if significant, is separated from the transaction price and accounted as interest income. Costs to obtain a contract which are incurred regardless of whether the contract was obtained are charged-off in profit or loss immediately in the period in which such costs are incurred. Incremental costs of obtaining a contract, if any, and costs incurred to fulfil a contract are amortised over the period of execution of the contract in proportion to the progress measured in terms of a proportion of actual cost incurred to-date, to the total estimated cost attributable to the performance obligation.

Significant judgments are used in:

- Determining the revenue to be recognised in case of performance obligation satisfied over a period of time; revenue recognition is done by measuring the progress towards complete satisfaction of performance obligation.
- Determining the expected losses, which are recognised in the period in which such losses become probable based on the expected total contract cost as at the reporting date.
- Determining the method to be applied to arrive at the variable consideration requiring an adjustment to the transaction price

- Revenue from operations

Revenue includes adjustments made towards liquidated damages and variation wherever applicable. Escalation and other claims, which are not ascertainable/acknowledged by customers are not taken into account.

- Revenue from sale of manufactured and traded goods including contracts for supply/commissioning of complex plant and equipment is recognised as follows:

Revenue is recognised when the control of the same is transferred to the customer and it is probable that the Company will collect the consideration to which it is entitled for the exchanged goods. Revenue from commissioning of complex plant and equipment is recognised either 'over time' or 'in time' based on an assessment of the transfer of control as per the terms of the contract.

- Revenue from construction/project related activity is recognised as follows:

- **Cost plus contracts:** Revenue from cost plus contracts is recognised over time and is determined with reference to the extent performance obligations have been satisfied. The amount of transaction price allocated to the performance obligations satisfied represents the recoverable costs incurred during the period plus the margin as agreed with the customer.

- **Fixed price contracts:** Contract revenue is recognised over time to the extent of performance obligation satisfied and control is transferred to the customer. Contract revenue is recognised at allocable transaction price which represents the cost of work performed on the contract plus proportionate margin, using the percentage of completion method. Percentage of completion is the proportion of cost of work performed to-date, to the total estimated contract costs.

For contracts where the aggregate of contract cost incurred to date plus recognised profits (or minus recognised losses as the case may be) exceeds the progress billing, the surplus is shown as contract asset and termed as “Due from customers”. For contracts where progress billing exceeds the aggregate of contract costs incurred to-date plus recognised profits (or minus recognised losses, as the case may be), the surplus is shown as contract liability and termed as “Due to customers”. Amounts received before the related work is performed are disclosed in the Balance Sheet as contract liability and termed as “Advances from customer”. The amounts billed on customer for work performed and are unconditionally due for payment i.e. only passage of time is required before payment falls due, are disclosed in the Balance Sheet as trade receivables. The amount of retention money held by the customers pending completion of performance milestone is disclosed as part of contract asset and is reclassified as trade receivables when it becomes due for payment. Impairment loss (termed as provision for foreseeable losses in the financial statements) is recognised in profit or loss to the extent the carrying amount of the contract asset exceeds the remaining amount of consideration that the Company expects to receive towards remaining performance obligations (after deducting the costs that relate directly to fulfill such remaining performance obligations). The Company recognises impairment loss (termed as provision for expected credit loss on contract assets in the financial statements) on account of credit risk in respect of a contract asset using expected credit loss model on similar basis as applicable to trade receivables.

- Revenue from rendering of services is recognised over time as the customer receives the benefit of the Company’s performance and the Company has an enforceable right to payment for services transferred. Unbilled revenue represents value of services performed in accordance with the contract terms but not billed

- **Container Freight station services**

- Income from cargo handling services is recognised as and when the related services are performed as per the contractual terms agreed with the customers. Revenue from providing services is recognised in the accounting period in which the services are rendered.

- Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are net of indirect taxes, trade allowances, rebates and amounts collected on behalf of third parties and is not recognised in instances where there is uncertainty with regard to ultimate collection. In such cases revenue is recognised on reasonable certainty of collection.

- Revenue from storage and warehousing is recognised prorata based on the period the container is kept in the Container freight station. However, in case of long standing containers, the revenue is accounted on the accrual basis to the extent, it is not unreasonable to expect ultimate collection.

- In an agency relationship, the commission income / service fee revenue is recorded on a net basis (net of cost incurred) and cost incurred is netted off with the relevant expenses incurred, since these are incurred on behalf of other parties.

- **Multimodal transport operations**

- Revenue from Export service is recognised on sailing of vessel and revenue from import services is recognised upon rendering of related services.

- **Third Party Logistics income**

- Third party logistic service charges and management fees are recognized as and when the service is performed as per contractual terms.

- Income from Transportation service are recognised as and when the services are performed as per Contractual terms.

- Reimbursement of cost is netted off with the relevant expenses incurred since the same are incurred on behalf of the customer.

- **Other income**

- Interest income on investments and loans is accrued on a time basis by reference to the principal outstanding and the effective interest rate including interest on investments classified as fair value through profit or loss or fair value through other comprehensive income. Interest receivable on customer dues is recognised as income in the Statement of Profit and Loss on accrual basis provided there is no uncertainty of realisation.

- Dividend income is accounted in the period in which the right to receive the same is established.

- Government grants, which are revenue in nature and are towards compensation for the qualifying costs incurred by the Company, are recognised as other income/reduced from underlying expenses in profit or loss in the period in which such costs are incurred. Government grants related to an

asset are reduced from the cost of an asset until the asset is ready to use and the grant post that is presented as deferred income. Subsequently the grant is recognised as income in profit or loss on a systematic basis over the expected useful life of the related asset. Government grant receivable in the form of duty credit scrips is recognised as other income in the Statement of Profit and Loss in the period in which the application is made to the government authorities and to the extent there is no uncertainty towards its receipt.

Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably

53 Leases where group is a lessee

For the purpose of IND AS 116 Group has followed Modified Approach- II, prospectively, except for short-term leases and leases of low-value assets and due to because of prescribed approach the company has measured ROU and Lease liability at the same amount at the time of initial recognition. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

The group has entered into rent agreements as a lessee for premises, which are in the nature of short-term leases having Lock-in period of less than 12 months. These leases has been accounted for applying Paragraph 6 of Ind AS 116

53.1 Changes in the Lease liabilities

Particulars	For the year ended March 31, 2024	For the year ended March 31, 2023
Opening Balance	548	2,231
Additions	631	264
Deletion	(306)	(359)
Accretion of interest	87	76
Payments	(169)	(129)
Adjustments*	-	(2,177)

Closing Balance	791	548
-----------------	-----	-----

*Due to sale of Investment in Apollo Logisolutions Ltd

53.2 Break-up of current and non-current lease liabilities

Particulars	31-Mar-24	31-Mar-23
Current Lease Liabilities	76	82
Non-current Lease Liabilities	714	466
Total	791	548

53.3 Amounts recognised in statement of Profit and Loss account

Particulars	31-Mar-24	31-Mar-23
Interest on Lease Liabilities	87	76
Depreciation on Right-of-use asset	130	163
Short term and Low-value leases expensed	307	363
Accumulated Depreciation on disposals	-	(392)
Total	524	211

The holding company has given office spaces on lease. The lease arrangements, are renewable on a periodic basis and for most of the leases extend up to a maximum of 5 years from their respective dates of inception and relates to rented premises. Some of these lease agreements have price escalation clauses and all other leases are cancellable.

Obligations on long-term, non-cancellable operating leases:

The lease rentals received during the year is as under

	For the year ended March 31, 2024	For the year ended March 31, 2023
Lease rentals recognized during the year	82	70

*The Magnolias flat and other Investment properties, are rented out and has been categorized by the company as an operating lease rather than a finance lease. Consequently, per IND AS 116, accounting for a finance lease receivable is not required. The rental income is directly recognized in the statement of profit and loss.

The obligations on long-term, non-cancellable operating leases receivable as per the rentals stated in the respective agreements are as follows:

	For the year ended March 31, 2024	For the year ended March 31, 2023
Future minimum lease receivable		
- Not later than one year		55
- Later than one year and not later than five years		65
- Later than five years		-

Consequently, per IND AS 116, accounting for a finance lease receivable is not required. The rental income is directly recognized in the statement of profit and loss.

The obligations on long-term, non-cancellable operating leases receivable as per the rentals stated in the respective agreements are as follows:

	For the year ended March 31, 2024	For the year ended March 31, 2023
Future minimum lease receivable		
- Not later than one year		55
- Later than one year and not later than five years		65
- Later than five years		-

Textual information (96)

Description of accounting policy for determining components of cash and cash equivalents [Text Block]

- Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, that are readily convertible to a known amount of cash and subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

I. Fair value hierarchy

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to Level 3, as described below:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

Hedged Assets	-	-	-	-

Valuation Technique used to determine Fair Value

The Group maintains policies and procedures to value financial assets or financial liabilities using the best and most relevant data available.

The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The following methods and assumptions were used to estimate the fair values:

- 1) Fair value of cash and deposits, trade receivables, trade payables, and other current financial assets and liabilities measured at amortized cost is approximate to their carrying amounts largely due to the short-term maturities of these instruments. The fair value of other non-current financial assets and liabilities (security deposit taken/given and advance to employees) carried at amortized cost is approximately equal to fair value. Hence carrying value and fair value is taken same.
- 2) Long-term variable-rate borrowings measured at amortized cost are evaluated by the Group based on parameters such as interest rates, specific country risk factors, credit risk and other risk characteristics. Fair value of variable interest rate borrowings approximates their carrying values. Risk of other factors for the Group is considered to be insignificant in valuation.

I. Fair value hierarchy

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to Level 3, as described below:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

Valuation Technique used to determine Fair Value

The Group maintains policies and procedures to value financial assets or financial liabilities using the best and most relevant data available.

The fair values of the financial assets and liabilities are included at the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The following methods and assumptions were used to estimate the fair values:

- 1) Fair value of cash and deposits, trade receivables, trade payables, and other current financial assets and liabilities measured at amortized cost is approximate to their carrying amounts largely due to the short-term maturities of these instruments. The fair value of other non-current financial assets and liabilities (security deposit taken/given and advance to employees) carried at amortized cost is approximately equal to fair value. Hence carrying value and fair value is taken same.
- 2) Long-term variable-rate borrowings measured at amortized cost are evaluated by the Group based on parameters such as interest rates, specific country risk factors, credit risk and other risk characteristics. Fair value of variable interest rate borrowings approximates their carrying values. Risk of other factors for the Group is considered to be insignificant in valuation.

Operating segment

An entity shall report separately information about an operating segment that meets any of the following quantitative thresholds:

(a) Its reported revenue, including both sales to external customers and intersegment sales or transfers, is 10 per cent or more of the combined revenue, internal and external, of all operating segments.

(b) The absolute amount of its reported profit or loss is 10 per cent or more of the greater, in absolute amount, of (i) the combined reported profit of all operating segments that did not report a loss and (ii) the combined reported loss of all operating segments that reported a loss.

(c) Its assets are 10 per cent or more of the combined assets of all operating segments. Operating segments that do not meet any of the quantitative thresholds may be considered reportable, and separately disclosed, if management believes that information about the segment would be useful to users of the financial statements.

If the total external revenue reported by operating segments constitutes less than 75 per cent of the entity's revenue, additional operating segments shall be identified as reportable segments (even if they do not meet the criteria in paragraph 13) until at least 75 per cent of the entity's revenue is included in reportable segments.

The Whole Time Director of the holding Company has been identified as the Chief Operating Decision Maker (CODM) as defined by Ind AS 108, Operating Segments. The CODM monitors the operating results of its business segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the financial statements. Operating segments have been identified on the nature of products and services and have been identified as per the quantitative criteria specified in the Ind AS. The Company has identified business segments as its primary segment and geographical segments as its secondary segment. Business segments are primarily (i) Trading of Tyres, Tubes/Flaps and others (ii) Engineering & Projects Division and (iii) Fashion Division. Revenues and expenses directly attributable to segments are reported under each reportable segment. Expenses which are not directly identifiable to each reportable segment have been allocated on the basis of associated revenues of the segment and manpower efforts. All other expenses which are not attributable or allocable to segments have been disclosed as unallocable expenses. Assets and liabilities that are directly attributable or allocable to segments are disclosed under each reportable segment. All other assets and liabilities are disclosed as unallocable. Geographical revenues are allocated based on the location of the customer. Geographical segments of the holding Company are Africa, Europe, India, Middle East, Far East, America and Others.

Apollo Green Energy Limited (Formerly known as Apollo International Limited) ("the holding Company") was set up in 1994 to lead the business diversification process of the Apollo International group into new business opportunities worldwide. The Company is engaged in export of diverse range of products and equipment in the field of steel, cement, water treatment plants and other infrastructure projects through its Engineering & Projects Division, manufacturing and export of leather garments and accessories through its Tag Fashion Division, export and domestic sale of tyres, tubes and flaps through its and Tyre Tech Global Division with its subsidiaries. Presently, the Company has 9 subsidiaries / step down subsidiaries and 1 Associate Company incorporated in India and 7 subsidiaries / step down subsidiaries incorporated outside India.
